2009**

Penelitian ini bertujuan untuk mengetahui apakah : (1) ada hubungan yang positif signifikan antara status sosial ekonomi orang tua dengan minat berwirausaha, (2) ada hubungan yang positif signifikan antara prestasi belajar kejuruan siswa dengan minat berwirausaha pada siswa-siswi kelas 2 dan 3 jurusan penjualan SMK Sanjaya Pakem Sleman Yogyakarta.

Pengumpulan data dilaksanakan pada bulan September 2008. Populasi penelitian berjumlah 52 siswa. Pengumpulan data menggunakan metode kuesioner dan wawancara. Untuk menguji hipotesis penelitian menggunakan metode analisis korelasi *product moment* dari Pearson.

Hasil penelitian menunjukkan bahwa : (1) ada hubungan yang positif dan signifikan antara status sosial ekonomi orang tua dengan minat berwirausaha, hal ini berdasarkan hasil perhitungan nilai koefisien korelasi bernilai positif dan nilai $r = 0,349$, sedangkan hasil pengujian $t_{hitung} = 2,751$ lebih besar dari $t_{tabel} = 1,676$. (2) ada hubungan yang positif dan signifikan antara prestasi belajar kejuruan siswa dengan minat berwirausaha, hal ini berdasarkan hasil perhitungan nilai koefisien korelasi bernilai positif dan nilai $r = 0,254$, sedangkan $t_{hitung} = 2,029$ lebih besar dari $t_{tabel} = 1,676$.

ABSTRACT

THE RELATIONSHIP BETWEEN THE ECONOMIC AND SOSIAL STATUS OF THE PARENTS AND STUDENTS' ACHIEVEMENT TOWARD THE INTEREST OF ENTREPRENEURSHIP

A Case Study on : The second and third year students of Marketing Department Sanjaya Vocational Senior High School in Pakem, Sleman, Yogyakarta

This research aims to know whether : (1) there is any positive and significant relationship between the economical and social status of the parents towards entrepreneurship ; (2) there is any positive and significant relationship between students' achievement towards entrepreneurship of the students of the second and the third of students Marketing Department of Sanjaya Vocational Senior High School.

Data collecting was done in September 2008. The population of the research was 52 students. The data were collected by using questionnaire and interviews methods. To analyse the hypotheses, product moment from Pearson correlation analysis was applied.

The result of the research shows that : (1) there is a positive and significant correlation between the economical and social status of the parents towards entrepreneurship; the value of $r = 0,349$, while the examination result is $t_{count} = 2,751$ it is bigger than $t_{table} = 1,676$. (2) there is a positive and significant correlation between students' achievement towards entrepreneurship, this positive calculation coefficient value and value of $r = 0,254$, while the examination result is $t_{count} = 2,029$ is bigger than $t_{table} = 1,676$.
