Yogyakarta
2008

Penelitian ini bertujuan untuk mengetahui apakah: (1) ada hubungan positif antara status sosial ekonomi orang tua dengan minat siswa bersekolah di SMA Budi Mulia; (2) ada hubungan positif antara persepsi siswa tentang SMA Budi Mulia dengan minat siswa bersekolah di SMA Budi Mulia.

Penelitian ini merupakan penelitian studi kasus di SMA Budi Mulia, Minggir pada bulan oktober 2008. Populasi dalam penelitian ini adalah seluruh siswa SMA Budi Mulia yang berjumlah 20 siswa. Karena jumlah populasinya berada di bawah 100 maka penelitian ini merupakan penelitian populasi. Teknik pengumpulan data dengan menggunakan kuesioner dan dokumentasi. Teknik analisis data dilakukan dengan menggunakan korelasi *product moment* dari pearson.

Hasil penelitian menunjukkan bahwa: (1) ada hubungan positif antara status sosial ekonomi orang tua dengan minat siswa bersekolah di SMA Budi Mulia ($r_{xy} = 0,019$); (2) tidak ada hubungan positif antara persepsi siswa tentang SMA Budi Mulia dengan minat siswa bersekolah di SMA Budi Mulia ($r_{xy} = -0,027$).

ABSTRACT

THE CORRELATION BETWEEN SOCIAL ECONOMY STATUS OF PARENTS AND CHILDREN'S PERCEPTION TO STUDY IN BUDI MULIA HIGH SCHOOL

Case Study at Budi Mulia Senior High School, Sendangagung Village, Minggir, Sleman Recency Yogyakarta

The aims of the research are to find out (1) the positive correlation between social economy status of parents and their children's interest to study in Budi Mulia Senior High School; (2) the positive correlation between students' perception about Budi Mulia Senior High School and students' interest to study in Budi Mulia Senior High School.

This research is a case study in Budi Mulia Senior High School, in Minggir village conducted in September 2008. The population of this research are 20 students of Budi Mulia Senior High School. Because the sum of the population is under 100, this research is called a population research. The data collection techniques are questioner and documentation. Data analysis technique is correlation of *product moment* from Pearson.

The results of the research indicate that (1) there is positive correlation between social economy status of parents and their children's interest to study in Budi Mulia Senior High School ($r_{xy} = 0,019$); (2) there isn't positive correlation between students' perception about Budi Mulia Senior High School and students' interest to study in Budi Mulia Senior High School ($r_{xy} = -0,027$).
