

ABSTRAK

SIKAP GURU SMA TERHADAP PROGRAM SERTIFIKASI GURU Studi Kasus Pada Guru Ekonomi dan Akuntansi SMA di Kota Yogyakarta

Astri Tumanggor
Universitas Sanata Dharma
2008

Penelitian ini bertujuan untuk mengetahui: (1) ada tidaknya perbedaan sikap guru SMA terhadap program sertifikasi guru berdasarkan masa kerja; (2) ada tidaknya perbedaan sikap guru SMA terhadap program sertifikasi guru berdasarkan kondisi sosial ekonomi.

Penelitian ini merupakan penelitian studi kasus dengan populasi penelitian yaitu guru ekonomi dan akuntansi SMA di Kota Yogyakarta. Teknik pengambilan sampel dalam penelitian ini yaitu *proporsional random sampling* dan diperoleh 20 SMA sebagai sampel penelitian. Data dalam penelitian ini, yaitu sikap guru yang dikumpulkan menggunakan kuesioner dengan Skala Likert yang terlebih dahulu dilakukan pengujian validitas dan reliabilitas. Teknik analisis data dalam penelitian ini menggunakan *One Way ANOVA* untuk sikap guru SMA terhadap program sertifikasi berdasarkan masa kerja dan *t-test* untuk sikap guru SMA terhadap program sertifikasi guru berdasarkan kondisi sosial ekonomi dengan bantuan komputer program *SPSS versi 15.0 for Windows*.

Hasil pengujian menunjukkan bahwa: (1) tidak ada perbedaan sikap guru SMA terhadap program sertifikasi guru berdasarkan masa kerja ($F_{hitung} = 1,797$? $F_{tabel} = 3,24$); (2) tidak ada perbedaan sikap guru SMA terhadap program sertifikasi guru berdasarkan kondisi sosial ekonomi ($t_{hitung} = 1,073$, dengan *Asymp. Sig* = $0,290 > 0,05$).

ABSTRACT

SENIOR HIGH SCHOOL TEACHERS' ATTITUDES TOWARDS TEACHER'S PROFESSIONAL CERTIFIED PROGRAM A Case Study on Economic and Accounting Teachers in Senior High Schools in Yogyakarta

Astri Tumanggor

2008

This research is intended to know (1) the differences of senior high school teachers' attitudes towards teacher's professional certified program based on the service duration; (2) the differences of senior high school teachers' attitudes towards teacher's professional certified program based on the social economy condition.

This research is a case study. The research populations are economic and accounting senior high school teachers in Yogyakarta. The technique of taking the sample is proportional random sampling. There are 20 senior high schools as the samples. The data of this research are the teachers' attitudes which were gathered by using questionnaires which have been checked their validity and reliability. The data analysis technique is *One Way ANOVA* for senior high school teachers' attitudes towards teacher's professional certified program based on the service duration and *t-test* for senior high school teachers' attitudes towards teacher's professional certified program based on the social economy condition which was analysed by the help of *SPSS version 15.0 for Windows* computer program.

The result shows that (1) there isn't any difference of senior high school teachers' attitude towards teacher's professional certified program based on the service duration ($F_{count} = 1.797 < F_{table} = 3.24$); (2) there isn't any difference of senior high school teachers' attitude towards teacher's professional certified program based on the social economy condition ($t\text{-test} = 1.073$, with *Asymp. Sig* = $0.290 > 0.05$).
