

ABSTRAK**HUBUNGAN ANTARA PRESTASI BELAJAR SISWA, PERSEPSI SISWA TERHADAP JURUSAN, DAN MOTIVASI BELAJAR DENGAN MINAT SISWA DALAM MEMILIH JURUSAN DI SMA**

Studi Kasus: SMA Pangudi Luhur Sedayu

Agatha Dhian Novita
Universitas Sanata Dharma
2010

Tujuan penelitian ini adalah menyediakan bukti mengenai ada tidaknya hubungan antara: (1) prestasi belajar siswa dengan minat siswa dalam memilih jurusan di SMA; (2) persepsi siswa terhadap jurusan dengan minat siswa dalam memilih jurusan di SMA; (3) motivasi belajar dengan minat siswa dalam memilih jurusan di SMA; (4) prestasi belajar siswa, persepsi siswa terhadap jurusan dan motivasi belajar dengan minat siswa dalam memilih jurusan di SMA.

Penelitian dilaksanakan di SMA Pangudi Luhur Sedayu pada bulan Maret 2010. Data dikumpulkan dengan menggunakan metode kuesioner, dokumentasi dan wawancara. Dengan populasi sebanyak 90 siswa diambil seluruhnya sebagai sampel penelitian. Data dianalisis dengan menggunakan analisis korelasi *product moment* dan regresi ganda dengan menggunakan taraf signifikansi (α) 5%.

Dari analisis data dapat disimpulkan: (1) ada hubungan antara prestasi belajar siswa dengan minat siswa dalam memilih jurusan di SMA, yang dibuktikan dengan koefisien korelasi (r) 0,210 dengan probabilitas 0,047; (2) ada hubungan antara persepsi siswa terhadap jurusan dengan minat siswa dalam memilih jurusan di SMA, yang dibuktikan dengan koefisien korelasi (r) 0,684 dengan probabilitas 0,00; (3) ada hubungan antara motivasi belajar dengan minat siswa dalam memilih jurusan di SMA, yang dibuktikan dengan koefisien korelasi (r) 0,512 dengan probabilitas 0,00; (4) ada hubungan antara prestasi belajar siswa, persepsi siswa terhadap jurusan dan motivasi belajar dengan minat siswa dalam memilih jurusan di SMA, yang ditunjukkan dengan koefisien korelasi berganda (R) 0,722 dengan probabilitas 0,00.

ABSTRACT**THE CORRELATION BETWEEN STUDENTS' LEARNING ACHIEVEMENT, PERCEPTION ON THE MAJOR SUBJECT, LEARNING MOTIVATION AND STUDENTS' INTEREST IN CHOOSING MAJOR SUBJECT IN SENIOR HIGH SCHOOL**

A Case Study: Pangudi Luhur Sedayu Senior High School

Agatha Dhian Novita
Sanata Dharma University
2010

The aim of this study is to provide the facts whether there is positive or negative correlation between: (1) students' achievement and students' interest in choosing the major subject in Senior High School; (2) students' perception on the major subject and students' interest in choosing the major subject in Senior High School; (3) learning motivation and students' interest in choosing the major subject in senior High School; (4) students' learning achievement, students' perception on the major subject, learning motivation and students' interest in choosing the major subject in Senior High School.

The study was conducted at Pangudi Luhur Sedayu Senior High School in March 2010. The data were gathered by questionnaire method, documentation, and interview. The population of study was 90 students and all of them were the samples. While the data analysis was product moment correlation analysis and double regression with the level signification of (α) 5%.

Based on the data analysis it concludes. (1) there is correlation between students' achievement and students' interest in choosing the major subject in Senior High School, which had been proven by the correlation coefficient (r) 0,210 with probability 0,047; (2) there is correlation between students' perception on the major subject and students' interest in choosing the major subject in Senior High School, which had been proven by correlation coefficient (r) 0,684 with the probability 0,00; (3) there is correlation between learning motivation and students' interest in choosing the major subject in Senior High School, which was proven by correlation coefficient (r) 0,512 with the probability 0,00; (4) there is correlation between students' learning achievement, students' perception on the major subject, learning motivation and students' interest in choosing the major subject in Senior High School, which was shown by double correlation coefficient (R) 0,722 with the probability 0,00.
