

**HUBUNGAN ANTARA PERSEPSI DUKUNGAN SOSIAL KELUARGA  
DAN MOTIVASI BERPRESTASI PADA SISWA KELAS X  
SMA YOS SUDARSO CILACAP**

*Florentina Prastika Kurniasari*

**ABSTRAK**

Penelitian ini bertujuan untuk mengetahui hubungan antara persepsi dukungan sosial keluarga dan motivasi berprestasi pada siswa SMA. Hipotesis penelitian ini yaitu ada hubungan positif antara persepsi dukungan sosial keluarga dan motivasi berprestasi. Responden penelitian ini adalah 71 siswa SMA (laki-laki 35 orang, perempuan 36 orang), dengan rentang usia 15 sampai 18 tahun. Instrument dalam penelitian ini menggunakan skala motivasi berprestasi, yang terdiri dari 31 item dengan reliabilitas ( $\alpha$ ) = 0.926, dan skala persepsi dukungan sosial keluarga yang terdiri dari 30 item dengan reliabilitas ( $\alpha$ ) = 0.951. Analisis data menggunakan korelasi *Spearman Rho*. Hasil analisis menunjukkan bahwa variabel persepsi dukungan sosial keluarga berkorelasi positif dan signifikan dengan motivasi berprestasi ( $r = 0.731$ ,  $p = 0.000$ ).

Kata kunci: persepsi dukungan sosial keluarga, motivasi berprestasi, siswa

**THE CORRELATION BETWEEN PERCEPTION OF FAMILY SOCIAL SUPPORT AND ACHIEVEMENT MOTIVATION IN STUDENTS 10<sup>th</sup> GRADE AT YOS SUDARSO CILACAP SENIOR HIGH SCHOOL**

*Florentina Prastika Kurniasari*

**ABSTRACT**

The research aimed to know the correlation between perception of family social support and achievement motivation in students of Senior High School. Hypothesis submitted in this research said that there is the correlation between perception of family social support and achievement motivation. The subject of this research were 71 people (35 males and 36 females), with an age range of 15 to 18 years. The independent variable of this research is the perception of family social support, while the achievement motivation as dependent variable. The instrument in this study using a scale of achievement motivation, which consists of 31 items with reliability ( $\alpha$ ) = 0.926, and the perception of family social support scale consisting of 30 items with reliability ( $\alpha$ ) = 0.951. Data analysis using *Spearman Rho*. The analysis showed that the perception of family social support variables positively and significantly correlated with achievement motivation ( $r = 0.731$ ,  $p = 0.000$ ).

**Keywords:** the perception of family social support, achievement motivation students.
