**ABSTRAK**

Penelitian yang telah dilakukan bertujuan untuk mengetahui hubungan antara konsep diri dan kreativitas dengan karya kreatif pada mahasiswa Jurusan Seni Murni, Fakultas Seni Rupa, ISI Yogyakarta. Hipotesis dalam penelitian ini adalah ada hubungan positif antara konsep diri dengan karya kreatif, dan ada hubungan positif antara kreativitas dengan karya kreatif. Penelitian ini melibatkan 34 mahasiswa di Jurusan Seni Rupa Murni, Fakultas Seni Rupa, ISI Yogyakarta yang berusia di atas 19 tahun. Metode yang digunakan untuk mengumpulkan data adalah dengan penyebaran skala konsep diri yang diisi oleh setiap subjek, penggunaan tes untuk mengukur kreativitas, dan memperoleh data nilai matakuliah praktik mahasiswa. Analisis data menggunakan koefisien reliabilitas pada skala konsep diri sebesar 0.882, sedangkan tes kreativitas sebesar 0.983. *Crosstabs* Uji Korelasi Data Ordinal menunjukkan tidak ada hubungan antara konsep diri dengan karya kreatif ( $r = 0.048$  ;  $p > 0.05$ ); Kendall's tau-b sebesar 0.050, Kendall's tau-c sebesar 0.045, Gamma sebesar 0.068, korelasi Spearman sebesar 0.071, dan korelasi interval Pearson's R sebesar 0.121. Sebaliknya ada hubungan antara kreativitas dengan karya kreatif ( $r = 0.316$  ;  $p < 0.05$ ); Kendall's tau-b sebesar 0.327, Kendall's tau-c sebesar 0.303, Gamma sebesar 0.429, korelasi Spearman sebesar 0.475, and korelasi interval Pearson's R sebesar 0.381. Hasil korelasi Parsial menunjukkan bahwa tidak ada hubungan antara konsep diri dengan karya kreatif ( $r = 0.121$  ;  $p > 0.05$ ). Walaupun ada korelasi antara kreativitas dengan karya kreatif ( $r = 0.042$  ;  $p < 0.05$ ). Diketahui bahwa kreativitas menyumbang sebesar 18% terhadap karya kreatif.

Kata kunci : konsep diri, kreativitas, karya kreatif, mahasiswa

**THE CORRELATION BETWEEN SELF CONCEPT AND CREATIVITY  
WITH ART PERFORMANCE TO COLLEGE STUDENTS OF  
FINE ARTS DEPARTMENT OF VISUAL ARTS FACULTY OF  
INDONESIAN INSTITUTE OF THE ARTS YOGYAKARTA**

*Elisabeth Yura Attika Ara Wahana*

**ABSTRACT**

*The research aimed to identify correlation between self concept, creativity and art learning in college students of Fine Arts Department of ISI Yogyakarta. The hypothesis of this research were that there was positive correlation between self concept and art performance, and there was a positive correlation between creativity and art performance. This study involved 34 college students in Department of Fine Arts, Faculty of Fine Arts, ISI Yogyakarta over the age of 19 years. The methods used to collect the data was the spread of self concept scale completed by each subject, the use of tests to measure creativity, and obtain the data mark of the courses practice the college students. Data was analyzed using reliability coefficient of self concept scale was 0.882 whereas 0.983 for creativity test. The Crosstabs of measures for ordinal data result showed that there was no correlation between self concept and art performance ( $r = 0.048$  ;  $p > 0.05$ ); Kendall's tau-b of 0.050, Kendall's tau-c of 0.045, Gamma of 0.068, Spearman correlation of 0.071, and correlation of interval Pearson's R of 0.121. Conversely there was a correlation between creativity and art performance ( $r = 0.316$  ;  $p < 0.05$ ); Kendall's tau-b of 0.327, Kendall's tau-c of 0.303, Gamma of 0.429, Spearman correlation of 0.475, and correlation of interval Pearson's R of 0.381. By using partial correlation, it showed that there was no correlation between self concept and art performance ( $r = 0.121$  ;  $p > 0.05$ ). However, there was a correlation between creativity and art performance ( $r = 0.042$  ;  $p < 0.05$ ). Also, it accounted for 18% of art performance.*
