The purposes of this study were to examine the influence of consumer satisfaction in a restaurant's service quality context, customer's satisfaction towards the restaurant, and also the aspect of service quality which has the most significant effect on satisfaction of customer of Pringsewu Garden Restaurant, Yogyakarta.

Data collection was conducted by using questionnaire, observation, and study of literature. The questionnaire was distributed to 100 respondents. Regression analysis was used to know the service quality in terms of welcoming, giving service and table of menu, table manner, and payment service and "thank you" statement. Regression for knowing the customers' satisfaction, level analysis of multiple regression was employed.

The results of study showed that the service of welcoming and also service of giving table of menu and service to the costumer's satisfaction resulted in insignificant effects. The service of payment and "thank you" statement resulted in the most significant effect. The service elements simultaneously affected customers' satisfaction positively and significantly.
