This research aimed to investigate different perception on Marketing Mixes of several soccer shoes brands based on consumers' age, occupation, and income. The populations in this study were the soccer players who became the member of soccer club in *Sinduadi* district and were officially registered in *Pengcab PSSI*. The research was conducted by distributing questionnaire to 83 respondents. The respondents were taken using Quota Sampling method. The instruments in this research were tested using validity and reliability test. Then, the data were tested using Oneway Anova method. Data results showed that there were no differences in perception on the Marketing Mixes bases on consumers' age, occupation, and income. Besides, the result also showed that there was no different perception of Marketing Mixes from the consumers of various soccer shoes brands.
