Universitas Sanata Dharma

Yogyakarta

2002

Penelitian ini bertujuan untuk mengetahui karakteristik karyawan PT. Era Sukses Mandiri dan perbedaan tingkat kedisiplinan pemakaian alat pelindung diri dilihat dari jenis kelamin, masa kerja, dan pendidikan.

Data diperoleh dengan menyebarkan kuesioner kepada 70 responden yakni karyawan bagian produksi. Karakteristik karyawan dianalisis dengan menggunakan analisis persentase, sedangkan untuk mengetahui ada tidaknya perbedaan tingkat kedisiplinan pemakaian alat pelindung diri dilihat dari jenis kelamin, masa kerja dan pendidikan digunakan analisis Chi-Kuadrat.

Hasil penelitian menunjukkan bahwa sebagian besar karyawan PT. Era Sukses Mandiri adalah pria, masa kerja lebih dari 36 bulan, dan pendidikan SMA. Untuk analisis Chi-Kuadrat diperoleh hasil : 1) Ada perbedaan tingkat kedisiplinan pemakaian alat pelindung diri (topi pelindung kepala, masker) dilihat dari jenis kelamin dan tidak ada perbedaan tingkat kedisiplinan pemakaian alat pelindung diri (sarung tangan) dilihat dari jenis kelamin; 2) Ada perbedaan tingkat kedisiplinan pemakaian alat pelindung diri (topi pelindung kepala, sarung tangan, masker) dilihat dari masa kerja; 3) Ada perbedaan tingkat kedisiplinan pemakaian alat pelindung diri (topi pelindung kepala, sarung tangan, masker) dilihat dari pendidikan.

ABSTRACT

The Differences In Discipline Level Of Using Self-Protective Tools Based On Gender, Working Period And Education

2002

The objective of this research was to find out the characteristics of employees of PT. Era Sukses Mandiri and differences in discipline level of using self-protective tools based on gender, working period and education.

The data were obtained by distributing questionnaires to 70 respondents working as production staff. The characteristics of employees were analyzed using the Percentage Analysis, meanwhile the Chi-Square Analysis was used to find out whether or not there were differences of discipline level in using self-protective tools based on gender, working period and education.

The results of this research proved that most of employees of PT. Era Sukses Mandiri were men, had working period of more than 36 months, and the level of education was Senior High School. The results from Chi-Square Analysis were : 1) There were differences in discipline level of using self-protective tools (protective headgears, mask) based on gender and there was not any differences in discipline level of using self-protective tools (gloves) based on gender; 2) There were differences in discipline level of using self-protective tools (protective headgears, gloves, mask) based on the working period; 3) There were differences in discipline level of using self-protective tools (protective headgears, gloves, mask) based on the education level.
