Dear Maywan Hariono,

Thank you for submitting your paper for publication in our Malaysian Journal of Chemistry. We are pleased to inform that we have received the comments and suggestions from the reviewers.

Please do make some revisions as written below before we make the final decisions whether your manuscript is ready for publication.

1. Please do some minor corrections on grammatical errors as highlighted on your manuscript.
2. The NMR spectra are poor. Please remove them from the main text and make it only in the characterization style.
3. We suggest the title to be changed to: Alkylation of Theobromine: Preparation of Isopropyl and Sec-butyl-theobromine using N,N-dimethylformamide as solvent

Regards

Ms. B. K. Ong
