

**HUBUNGAN ANTARA PERSEPSI TERHADAP PENERIMAAN ORANG  
TUA DENGAN ASERTIVITAS REMAJA AKHIR**

*Sesilia Widaningtyas*

**ABSTRAK**

Penelitian ini bertujuan untuk mengetahui hubungan antara persepsi terhadap penerimaan orang tua dengan asertivitas remaja akhir. Subjek dalam penelitian ini adalah remaja akhir yang berusia 16 – 18 tahun. Jumlah subjek adalah 125 orang. Hipotesis dalam penelitian ini adalah adanya hubungan positif antara persepsi terhadap penerimaan orang tua dengan asertivitas remaja akhir. Data penelitian diperoleh dengan menggunakan dua skala Likert yaitu skala persepsi terhadap penerimaan orang tua dan skala asertivitas. Reliabilitas Skala persepsi terhadap penerimaan orang tua adalah 0,940 dan reliabilitas Skala asertivitas adalah 0,822. Reliabilitas diperoleh menggunakan teknik *Cronbach's Alpha*. Data dalam penelitian ini dianalisis dengan menggunakan korelasi *Spearman* dan diperoleh nilai korelasi sebesar 0,449 dengan nilai signifikan sebesar 0,000 ( $p < 0,05$ ). Hal ini berarti ada hubungan yang positif dan signifikan antara persepsi terhadap penerimaan orang tua dengan asertivitas remaja akhir.

Kata kunci : penerimaan orang tua, asertivitas, remaja akhir

**THE RELATIONSHIP BETWEEN PERCEPTION OF PARENTAL  
ACCEPTANCE AND ASSERTIVE OF LATE ADOLESCENCE**

*Sesilia Widaningtyas*

**ABSTRACT**

*This study was conducted to determine the relationship between perception of parental acceptance and assertiveness of late adolescence. In this research, the participants were the late adolescence who has aged 16 to 18 years old. There were 125 participants. The hypothesis of this research was that there was a positive relationship between perception of parental acceptance and assertiveness of late adolescence. The data in this research were obtained by using two Likert scales. They were perception of parental acceptance scale and assertiveness scale. Reliability of the perception of parental acceptance scale was 0.940 and reliability of the assertiveness scale was 0.822. Reliability were obtained by using technique of Cronbach Alpha. The data in this research was analyzed by using the Spearman correlation. The correlation value was 0.449 with a significant value of 0.000 ( $p < 0,05$ ). This result means that there was a positive and significant relationship between perception of parental acceptance and assertiveness of late adolescence.*

Keywords: parental acceptance, assertiveness, late adolescence
