Universitas Sanata Dharma

991334048

Penelitian ini bertujuan untuk mengetahui apakah ada hubungan antara 1) prestasi akademik mahasiswa dengan keikutsertaan mahasiswa di dalam kegiatan ekstrakurikuler. 2) lingkungan sosial mahasiswa dengan keikutsertaan mahasiswa di dalam kegiatan ekstrakurikuler. 3) persepsi mahasiswa terhadap kegiatan ekstrakurikuler dengan keikutsertaan mahasiswa di dalam kegiatan ekstrakurikuler. 4) prestasi akademik mahasiswa, lingkungan sosial mahasiswa dan persepsi mahasiswa terhadap kegiatan ekstrakurikuler secara bersama-sama dengan keikutsertaan mahasiswa di dalam kegiatan ekstrakurikuler.

Penelitian ini dilaksanakan pada Unit Kegiatan Kemahasiswaan, Universitas Sanata Dharma pada bulan September - Oktober 2003. Populasi penelitian ini adalah mahasiswa aktif yang mengikuti UKM Korps Suka Rela, UKM Paduan Suara Cantus Firmus, UKM Resimen Mahasiswa, UKM Kerohanian, UKM Teater Seriboe Djendela, UKM Mapasadha dan UKM Olah Raga Sepak Bola berjumlah 240 mahasiswa. Jumlah sampel sebanyak 100 mahasiswa diambil dengan teknik proposional random sampling. Teknik pengumpulan data yang digunakan adalah wawancara, kusioner dan dokumentasi.

Untuk menjawab permasalahan pertama, kedua dan ketiga digunakan analisis product moment, sedangkan untuk menjawab permasalahan keempat digunakan analisis korelasi regresi ganda pada taraf signifikansi 5%.

Hasil penelitian menunjukkan bahwa : 1) Ada hubungan yang positif dan signifikan antara prestasi akademik mahasiswa dengan keikutsertaan mahasiswa di dalam kegiatan ekstrakurikuler di Universitas Sanata Dharma ( $r_{x1y} = 0,466$  dan  $t_{hitung} = 5,24 > t_{tabel} = 1,66$ ). 2) Ada hubungan yang positif dan signifikan antara lingkungan sosial mahasiswa dengan keikutsertaan mahasiswa di dalam kegiatan ekstrakurikuler ( $r_{x2y} = 0,442$  dan  $t_{hitung} = 4,85 > t_{tabel} = 1,66$ ). 3) Ada hubungan yang positif dan signifikan antara persepsi mahasiswa terhadap kegiatan ekstrakurikuler dengan keikutsertaan mahasiswa di dalam kegiatan ekstrakurikuler ( $r_{x3y} = 0,499$  dan  $t_{hitung} = 5,70 > t_{tabel} = 1,66$ ). 4) Ada hubungan yang positif dan signifikan antara prestasi akademik mahasiswa, lingkungan sosial mahasiswa dan persepsi mahasiswa terhadap kegiatan ekstrakurikuler secara bersama-sama dengan keikutsertaan mahasiswa di dalam kegiatan ekstrakurikuler ( $R_{xy} = 0,639$  dan  $F_{hitung} = 22,06 > F_{tabel} = 2,67$ ).

## ABSTRACT

### A RELATIONSHIP BETWEEN UNIVERSITY STUDENTS' ACHIEVEMENT, THEIR SOCIAL ENVIRONMENT, THEIR PERCEPTION TOWARD EXTRACURRICULAR ACTIVITIES AND UNIVERSITY STUDENTS' PARTICIPATION IN EXTRACURRICULAR ACTIVITIES

A case study on Unit of Collegian Activities, Sanata Dharma University  
Mrican, Tromol Pos No. 29, Yogyakarta

This research was aimed to know whether or not there were any relationships between : 1) university students' achievement and their participation in extracurricular activities, 2) university students' environment and their participation in extracurricular activities, 3) perception of university students' toward extracurricular activities and their participation in extracurricular activities, 4) university students' achievement, their social environment, their perception toward extracurricular activities taken together and university students' participation in extracurricular activities.

This research was conducted in Unit of Collegian Activities at Sanata Dharma University Yogyakarta in September – October 2003. In this research, the population was active students who attended the Unit of Collegian Activities of "Volunteer Corps", Unit of Collegian Activities of "Cantus Firmus" Choirs, Unit of Collegian Activities of "Menwa", Unit of Collegian Activities of "Spiritual", Unit of Collegian Activities of "Seriboe Djendela" Theatre, Unit of Collegian Activities of "Hiking" and Unit of Collegian Activities of "Foot Ball" as many as 240 students. The number was reduced into the sample of 100 students with proportional random sampling technique. The data were gathered by using the techniques of interviews, questionnaire and documentation.

To answer the question number one, two and three, a technique of product moment correlation analysis was employed. As question number four the research had adopted multiple regression correlation analysis with coefficient analysis on signification degree at 5%.

The result of research indicated that : 1) There was a positive and significant relationship between university students' achievement and their participation in extracurricular activities ( $r_{x1y} = 0,466$  and  $t_{count} = 5,24 > t_{table} = 1,66$ ). 2) There was a positive and significant relationship between university students' social environment and their participation in extracurricular activities ( $r_{x2y} = 0,442$  and  $t_{count} = 4,85 > t_{table} = 1,66$ ). 3) There was a positive and significant relationship between students' university perception toward extracurricular activities and their participation in extracurricular activities ( $r_{x13} = 0,499$  and  $t_{count} = 5,70 > t_{table} = 1,66$ ). 4) There was a positive and significant relationship between university students' achievement, their social environment and their perception toward extracurricular activities taken together and university students' participation in extracurricular activities ( $R_{xy} = 0,639$  and  $F_{count} = 22,06 > F_{table} = 2,67$ ).
