Penelitian ini bertujuan untuk mengetahui apakah: (1) ada hubungan motivasi kerja siswa dengan prestasi siswa dalam praktik kerja industri; (2) ada hubungan lingkungan kerja institusi pasangan dengan prestasi siswa dalam praktik kerja industri; (3) ada hubungan motivasi kerja siswa dan lingkungan kerja institusi pasangan secara bersama-sama dengan prestasi siswa dalam praktik kerja industri.

Penelitian ini dilaksanakan di SMK Putra Tama Bantul Yogyakarta pada bulan Oktober sampai November 2004. Populasi penelitian ini adalah seluruh siswa kelas III yang telah melakukan praktik kerja industri. Sampel penelitian ini berjumlah 75 orang. Teknik penarikan sampel adalah metode *simple random sampling*. Metode pengumpulan data yang digunakan adalah kuesioner yang dilengkapi dengan teknik dokumentasi dan wawancara. Teknik analisis data yang digunakan adalah teknik analisis korelasi *product moment* dari Pearson dan analisis regresi ganda.

Hasil penelitian ini menunjukkan : (1) ada hubungan positif motivasi kerja siswa dengan prestasi siswa dalam praktik kerja industri ( $t_{tabel} = 2,643 < t_{hitung} = 5,0016$ ); (2) ada hubungan positif lingkungan kerja institusi pasangan dengan prestasi siswa dalam praktik kerja industri ( $t_{tabel} = 2,643 < t_{hitung} = 5,6869$ ); (3) ada hubungan positif motivasi kerja siswa dan lingkungan kerja institusi pasangan secara bersama-sama dengan prestasi siswa dalam praktik kerja industri ( $F_{tabel} = 3,124 < F_{hitung} = 30,9297$ ).

**ABSTRACT**  
**The Relationship Between Student Work Motivation,  
Working Environment of The Partner and Student Achievement  
during Job Training Program**

A Case Study in SMK Putra Tama Bantul Yogyakarta

**2005**

The aims of research were to know wheather there are any relationship between (1) student work motivation and student achievement during Job Training Program; (2) working environment of the partner and student achievement during Job Training Program; (3) student work motivation, working environment of the partner and student achievement during Job Training Program.

This research was carried out at SMK PUTRA TAMA Bantul Yogyakarta from October to November 2004. The population of this research was the third years students who had already done the Job Training Program, but only 75 students were taken as the research subjects. The technique of determining samples was simple random sampling. The techniques used to collect the data were questionnaire, documentation and interviews. The data were analyzed by applying Product Moment Correlation Person and used multiple regression analysis.

The result of this research shows that : (1) there is a positive and significant relationship between student work motivation and student achievement during Job Training Program ( $t_{table}= 2,643 < t_{count}= 5,0016$ ); (2) there is a positive and significant relationship between working environment of the partner and student achievement during Job Training Program ( $t_{table}= 2,643 < t_{count}= 5,6869$ ); (3) there is a positive and significant relationship between student work motivation, working environment of the partner and student achievement during Job Training Program( $F_{table}=3,124 < F_{count}= 30,9297$  ).
