

ABSTRAK

MINAT BIDANG PEKERJAAN SISWI KELAS III SMU SANTA MARIA YOGYAKARTA TAHUN AJARAN 2001/2002 DAN IMPLIKASINYA TERHADAP BIMBINGAN KARIER DI SEKOLAH

L. Aprilliana Wiwit Wahyuni, 2002

Tujuan penelitian ini adalah untuk mengetahui: (1) Peringkat bidang pekerjaan yang paling banyak diminati siswi kelas III SMU Santa Maria Yogyakarta tahun ajaran 2001/2002 dengan menggunakan tes 'RMIB', (2) Perbedaan peringkat minat bidang pekerjaan siswi kelas III SMU Santa Maria Yogyakarta tahun ajaran 2001/2002 pada jurusan IPS dan bahasa.

Subyek penelitian ini adalah siswi kelas III SMU Santa Maria jurusan IPS dan bahasa yang berjumlah 125 siswi. Jenis penelitian ini adalah penelitian deskriptif dengan metode survei menggunakan alat tes "*The Rothwell Miller Interest Blank (RMIB)*". Hasil penelitian ini diolah dengan menggunakan *Chi-Square* yang dimasukkan dalam program *Microsoft Excel 2002*.

Adapun setelah hasil kasar dari survei diolah maka kesimpulan dari penelitian ini adalah sebagai berikut:

1. Peringkat bidang pekerjaan yang paling banyak diminati siswi kelas III SMU Santa Maria Yogyakarta tahun ajaran 2001/2002 adalah *aesthetic* (517,5), *literary* (557), *social service* (592), *clerical* (623), *musical* (624), *medical* (662), *scientific* (717), *computational* (812), *personal contact* (910,5), *outdoor* (1111), *practical* (1201), *mechanical* (1424).
2. Ada perbedaan peringkat minat yang **signifikan** pada bidang pekerjaan siswi kelas III jurusan IPS dan Bahasa SMU Santa Maria Yogyakarta tahun ajaran 2001/2002 pada bidang pekerjaan *computational* dan *personal contact*. Sedangkan tidak ada perbedaan peringkat minat bidang pekerjaan (**tidak signifikan**) pada bidang pekerjaan *outdoor*, *mechanical*, *scientific*, *aesthetic*, *literary*, *musical*, *social service*, *clerical*, *practical*, dan *medical*.

ABSTRACT

THE VOCATIONAL INTEREST OF THE THIRD GRADE FEMALE STUDENTS OF THE SANTA MARIA HIGH SCHOOL IN YOGYAKARTA DURING 2001/2002 ACADEMIC YEAR AND ITS IMPLICATIONS TOWARD CAREER GUIDENCE AT SCHOOL

L. Aprilliana Wiwit Wahyuni, 2002

The aims of this research were to find out: (1) the highest vocational interest rank of the third grade female students at the Santa Maria High School in Yogyakarta during the 2001/2002 academic year. The test used was "RMIB Test". (2) the vocational interest rank different between the Social Science Major and the Language Science Major female students who were at the third grade in the Santa Maria High School in Yogyakarta 2001/2002 academic year.

The research subjects were the third grade female students of the Santa Maria High School in Yogyakarta during 2001/2002 academic year. They were majoring in social sciences and language sciences. This is a descriptive research using survey research method and "*The Rothwell Miller Interest Blank (RMIB)*" test. The research findings were computed by *Chi Square* method of analysis which was available at the *Microsoft Excel 2002* computational program.

After some computational process, the following were the research results:

1. the sequence of vocational interest rank among the third grade female students at the Santa Maria High School in Yogyakarta during the 2001/2002 academic was *aesthetic* (517,5), *literary* (557), *social service* (592), *clerical* (623), *musical* (624), *medical* (662), *scientific* (717), *computational* (812), *personal contact* (910,5), *outdoor* (1111), *practical* (1202), *mechanical* (1424).
2. there was a **significant** rank difference for the *computational* and *personal contact* vocational interest between the female students majoring in social science and language science who were at the third grade in the Santa Maria high school in Yogyakarta during 2001/2002. There was no vocational interest rank difference (**not significant**) among the *outdoor*, *mechanical*, *science*, *literary*, *musical*, *social service*, *clerical*, *practical* and *medical*.
