Penelitian ini bertujuan untuk mengetahui apakah ada hubungan antara 1) motivasi siswa terhadap kegiatan ekstrakurikuler dengan partisipasi siswa dalam kegiatan ekstrakurikuler, 2) persepsi siswa terhadap kegiatan ekstrakurikuler dengan partisipasi siswa dalam kegiatan ekstrakurikuler dan 3) motivasi siswa dan persepsi siswa terhadap kegiatan ekstrakurikuler dengan partisipasi siswa dalam kegiatan ekstrakurikuler.

Penelitian ini dilaksanakan pada kegiatan ekstrakurikuler, SMU BOPKRI 2 Yogyakarta pada bulan Juli sampai dengan Agustus 2005. Populasi penelitian ini adalah siswa kelas 2 SMU BOPKRI 2 Yogyakarta berjumlah 326 siswa. Jumlah sample sebanyak 100 siswa diambil dengan teknik proporsional random sampling. Teknik pengumpulan data yang digunakan adalah wawancara, kuesioner dan dokumentasi. Untuk menjawab permasalahan pertama dan kedua digunakan analisis korelasi product moment, sedangkan untuk menjawab permasalahan ketiga digunakan analisis korelasi ganda dan taraf signifikansi 5%.

Hasil penelitian menunjukkan bahwa 1) ada hubungan positif dan signifikan antara motivasi siswa terhadap kegiatan ekstrakurikuler dengan partisipasi siswa dalam kegiatan ekstrakurikuler ($r_{x1y} = 0,384$ dan $t_{hitung} = 4,117 > t_{tabel} = 1,6606$). 2) Ada hubungan positif dan signifikansi antara persepsi siswa terhadap kegiatan ekstrakurikuler dengan partisipasi siswa dalam kegiatan ekstrakurikuler ($r_{x2y} = 0,289$ dan $t_{hitung} = 2,988 > t_{tabel} = 1,6606$). 3) Ada hubungan positif dan signifikan antara motivasi siswa dan npersepsi siswa terhadap kegiatan ekstrakurikuler dengan partisipasi siswa dalam kegiatan ekstrakurikuler ($R_{xy} = 0,453$ dan $F_{hitung} = 12,522 > F_{tabel} = 3,090$).

A RELATIONSHIP BETWEEN STUDENTS' MOTIVATION AND THEIR PERCEPTION TOWARDS EXTRACURRICULUM ACTIVITIES AND THEIR PARTICIPATION IN EXTRACURRICULUM ACTIVITIES

**A Case Study at BOPKRI II Senior High School, Jl. Jenderal Sudirman 87
Yogyakarta**

This research aims to know whether there are any relationship between : 1) students' motivation towards extracurriculum activities and their participation in extracurriculum activities, 2) students' perception towards extracurriculum activities and their participation in extracurriculum activities and 3) students' motivation and their participation towards extracurriculum activities and their participation in extracurriculum activities.

This research was conducted in extracurriculum activities at BOPKRI 2 Senior High School Yogyakarta from Juli until Agustus 2005. In this research, the population were 326 students of the second grade of BOPKRI 2 Senior High School Yogyakarta. The samples were 100 students taken by applying *proportional random sampling technique*. The data were gathered by using the technique of interview, questionnaire and documentation. To answer the question number one and two, a technique of *product moment correlation analysis* was employed. Whereas to answer the question number three *multiple regression correlation analysis with coefficient analysis* on 5 % signification degree was applied.

The result of research indicates that : 1) there is a positive and significant relationship between students' motivation towards extracurriculum activities and their participation in extracurriculum activities ($r_{x_1y} = 0,384$ and $t_{hitung} = 4,117 > t_{tabel} n = 1,6606$) ; 2) there is a positive and significant relationship between students' perception towards extracurriculum activities and their perception in extracurriculum activities ($r_{x_2y} = 0,289$ and $t_{hitung} = 2,988 > t_{tabel} = 1,6606$) and 3) There is a positive and significant relationship between students' motivation and their perception towards extracurriculum activities and their participation in extracurriculum activities ($R_{xy} = 0,453$ and $F_{hitung} = 12,522 > F_{tabel} = 3.090$)
