Penelitian ini bertujuan untuk mengevaluasi proses pendataan penerima paket konversi, mengevaluasi proses penyaluran paket konversi dan mengevaluasi penggunaan paket konversi berupa gas sebagai substitusi minyak tanah.

Penelitian ini dilakukan di kecamatan Ngawen, kabupaten Klaten. Jenis penelitian ini adalah evaluatif, dengan subjek penelitian adalah penerima paket konversi dan pihak terkait. Teknik pengambilan sample adalah cluster sampling, insidental quota, dengan mengambil sample sebanyak 13 desa dengan 230 responden dari penerima paket konversi, 13 team leader dan 1 supervisor. Teknik pengumpulan data dengan wawancara berpedoman dan dokumentasi. Analisis data menggunakan reduksi data, penyajian data, dan kesimpulan.

Hasil penelitian ini menunjukkan:

1. Dalam proses pendataan penerima paket konversi di kecamatan Ngawen kabupaten Klaten terdapat 77,32% sudah sesuai dengan petunjuk pelaksanaan dan 22,68% belum sesuai dengan petunjuk pelaksanaan.
2. Dalam proses penyaluran paket konversi di kecamatan Ngawen kabupaten Klaten terdapat 92,71% sudah sesuai dengan petunjuk pelaksanaan dan 7,28% belum sesuai dengan petunjuk pelaksanaan.
3. Dalam proses penggunaan paket konversi berupa gas sebagai substitusi minyak tanah terdapat 89,95% sudah sesuai dengan petunjuk pelaksanaan dan 9,97% belum sesuai dengan petunjuk pelaksanaan karena paket konversi tersebut tidak digunakan.

**ABSTRACT**

**THE EVALUATION ON PROGRAM IMPLEMENTATION OF  
THE CONVERSION OF KEROSENE TO GAS  
IN NGAWEN SUBDISTRICT KLATEN REGENCY**
