## ABSTRAK

Kii, Noviana Ina. 2011. *Perbedaan Kemampuan Menyimak Rekaman Cerpen “Umi Kulsum” dan Profil “Soe Hok Gie” Siswa Kelas XI IPA dan Siswa Kelas XI IPS SMA Negeri 5 Yogyakarta Tahun Ajaran 2010/2011*. FKIP. PBSID. Yogyakarta : Universitas Sanata Dharma.

Penelitian ini bertujuan menemukan perbedaan tingkat kemampuan siswa kelas XI IPA dan siswa kelas XI IPS dalam menyimak rekaman cerpen “Umi Kulsum” dan profil “Soe Hok Gie”. Jenis penelitian ini adalah penelitian kuantitatif. Sampel dari penelitian ini adalah siswa kelas XI IPA 1 dan siswa kelas XI IPS 4 yang berjumlah 64 siswa. Instrumen yang digunakan adalah tes ingatan, pemahaman, penerapan, dan analisis.

Analisis data dilakukan dengan cara mencari skor rata-rata, kemudian digunakan untuk mengetahui rata-rata kemampuan menyimak rekaman cerpen “Umi Kulsum” dan profil “Soe Hok Gie” pada siswa kelas XI IPA dan siswa kelas XI IPS. Dari hasil analisis data diketahui bahwa kemampuan menyimak kedua jurusan tersebut berada dalam kategori baik. Rentang skor yang diperoleh untuk rekaman cerpen “Umi Kulsum” kategori baik kelas XI IPA adalah 87,82-92,90 dicapai oleh 14 siswa (43,75 %), sedangkan siswa kelas XI IPS pada rentang skor 90,97-96,15 dicapai oleh 20 siswa (62,5 %). Pada rekaman profil “Soe Hok Gie” kategori baik kelas XI IPA pada rentang skor 82,77-92,24 di capai oleh 11 siswa (34,38%), sedangkan kategori baik pada kelas XI jurusan IPS pada rentang skor 82,87-90,66 dicapai oleh 11 siswa (34,37%). Ada perbedaan kemampuan menyimak rekaman cerpen “Umi Kulsum” dan profil “Soe Hok Gie” siswa kelas XI IPA dan siswa kelas XI IPS secara deskriptif.

Dari hasil penelitian ini diharapkan berimplikasi terhadap pembelajaran bahasa Indonesia kelas XI IPA dan kelas XI IPS di SMA Negeri 5 Yogyakarta. Hal-hal yang perlu diperhatikan oleh guru, yaitu metode yang digunakan tidak hanya ceramah tetapi menggunakan metode lain misalnya metode tanya jawab dan metode diskusi. Guru harus menggunakan media, misalnya *tape recorder* dan televisi. Untuk kelas XI IPA materi yang disajikan berisi tentang sistem kerja organ tubuh manusia, sedangkan untuk kelas XI IPS materi berisi tentang adat istiadat suatu daerah. Kelas harus dirancang sedemikian rupa sehingga menjadi tempat yang baik dan aman dalam belajar.

## ABSTRACT

Kii, Noviana Ina, 2011. *The Difference Between Students' Competence in Scrutinizing the Recordings Short Story of "Umi Kulsum" and the Profile of "Soe Hok Gie" of Eleventh Graders of Natural Science Study Program and Social Science the State 5 Senior High School Yogyakarta Academic Year of 2010/2011*. FKIP .PBSID. Yogyakarta: Sanata Dharma University

The purpose of this research was to find out the difference between the levels of students' competence in scrutinizing the recordings of the short stor "*Umi Kulsum*" and the profile of "*Soe Hok Gie*" of the eleventh graders of Natural Science Study Program and of the eleventh graders of Social Science Study Program. The research was a quantitative one. While the sample were the eleventh graders of Natural Science class 1 and Social Science class 4 which consisted of 64 students. The instruments that were used were memory, comprehensive, application, and analyses test.

Data analyses technique was by finding out the average score, which was then used to identify the average of competence in scrutinizing the recordings of the short story of "*Umi Kulsum*" and the profile of "*Soe Hok Gie*" of the eleventh graders of Natural Science Study Program and Social Science Study Program. The results showed that the scrutinizing competence of the students of the two study programs were included into category "good", but the score range of the two programs implied some difference. The "good" score category of grade eleven students of natural science on the recording of "*Umi Kulsum*" ranged from 87,82 to 92,90, achieved by 14 students (43,75 %), whereas of the students of eleventh grade of Social science, the score ranged from 90, 97 to 96,15, achieved by 20 students (or 62,5%). The "good" score category of natural science students of the recording of the profile of "*Soe Hok Gie*", ranged from 82,77 to 92,24, achieved by 11 students (34,38%), while the "good" score of students of social science ranged from 82,87 to 90,66, achieved by 11 students (34,37%). There was a differencebetween students' competence in scrutinizing the recordings of short story "*Umi Kulsum*" and the profile of "*Soe Hok Gie*" of eleventh graders Natural Sciences and Social Sciences.

It was hoped that the research could have some implication in the teaching and learning Indonesian Language to the eleventh grade of natural science study program as well as the social study program at the fifth Public Senior High School – Yogyakarta. Some evidence from the result of the analyses and data discussions needed some attention from the teacher dealing with the methods that it would be better to include other methods such as questions and answers, aside from lecturing, that the students could avoid boredom, whereas the teacher would not get so fatigue. The teacher could also use discussion when giving some group task, use media such as tape-recorder and television. For the students of natural science, the material could deal with working system of human body, whereas for students of social science, the material could deal with the customs of an ethnic group in certain region. The class should better be designed so as to present a safe and good place for studying.
