**2005**

Penelitian ini bertujuan untuk mengetahui pengaruh kondisi sosial ekonomi orang tua yang meliputi tingkat pendidikan orang tua, jenis pekerjaan orang tua (pendidik dan bukan pendidik), tingkat pendapatan orang tua dan jumlah anak yang ditanggung orang tua terhadap minat siswa SMU untuk melanjutkan studi ke Perguruan Tinggi.

Penelitian ini dilaksanakan di SMU GAMA Yogyakarta. Yang menjadi subyek penelitian adalah siswa kelas III. Pengambilan sampel sebesar 100 orang siswa menggunakan teknik proporsional random sampling. Teknik analisis data yang digunakan adalah teknik analisis chi square ( $\chi^2$ ) dengan taraf signifikansi 0,05.

Hasil penelitian menunjukkan :

1. Terdapat pengaruh (dengan derajat sedang) tingkat pendidikan orang tua terhadap minat siswa melanjutkan studi ke Perguruan tinggi
2. Terdapat pengaruh (dengan derajat rendah) jenis pekerjaan orang tua terhadap minat siswa melanjutkan studi ke Perguruan Tinggi
3. Terdapat pengaruh (dengan derajat sedang) tingkat pendapatan orang tua terhadap minat siswa melanjutkan studi ke Perguruan Tinggi.
4. Terdapat pengaruh (dengan derajat sedang) jumlah anak yang ditanggung orang tua terhadap minat siswa melanjutkan studi ke Perguruan tinggi.

## ABSTRACT

### FACTORS INFLUENCING THE INTEREST OF SENIOR HIGH SCHOOL STUDENTS IN CONTINUING THEIR STUDY TO HIGHER EDUCATION

**Yuli Suhartanto**  
**SANATA DHARMA UNIVERSITY**

**2005**

The objective of this research is to know whether there is significant influence between the social economic condition of parents which consists of : the education level of parents, their occupations ( educated and non educated parents ), their level of income, the number of their children and the interest of Senior High School students in continuing their study to higher education, like university or college.

This research was carried out at GAMA Senior High School Yogyakarta. The subjects of this research were the third years students. There were 100 samples. Sampling technique used was proportional random sampling. Data analysis technique used was chi– square analysis  $\chi^2$  with significant level 0,05.

The result of the research indicates :

1. There is moderate influence between the education level of parents and the interest of the third year students in continuing their study to higher education.
2. There is low influence between kinds of occupation of the parents and the interest of the third year students in continuing their study to higher education.
3. There is moderate influence between the income level of parents and the interest of the third year students in continuing their study to higher education.
4. There is low influence between the number of the children the parents supported and the interest of the third year students in continuing their study to higher education.
