

# Indonesian Islamic Media Hacked and Lost Its On-Line Accounts

[AntoniusHerujiyanto AH19\_150318]

One of Indonesian Islamic media, *eramuslim.com* has been hacked, again. Its management said Saturday (on 10 March) that it was not accessible. Anyone trying to do so would only see a long message, saying, among others, ““#RIPMCA ... not to sell religion in the name of your vested interests....” It was very fortunate that within one hour the IT Team of the media managed to fight against the hack and it could be, therefore, accessed again.

Mentioning that its two official *Fans Page* accounts, *eramuslimers* and *new eramuslimers* were not able to be accessed yet.

Believing that those enemies of Allah would keep attacking and hacking Islamic media, the management called on Muslims to be always prepared and cautious. With the spirit of never being afraid, the soldiers of Allah would end up with a victory. Allahu Akbar!

The management has also received encouraging comments from its faithful followers through Telkomsel, one of local Indonesia social media, saying, among others, “Eramuslim, the resourceful Islamic media, has successfully countered its hackers... they would certainly attack other Islamic sites”; “Why don’t you just report it to the police. Hacking is a crime, violating the Electronic, Information and Transaction Law”; “Watch out on those attempts to pit Muslims against each other...”
