

Indonesian Political Figure To Re-appropriate Jokowi's Agenda

[AntoniusHerujiyanto AH27_200418]

The General Chairman of PKB or the (Islamic) National Awakening Party, Muhaimin Iskandar has criticized President Jokowi's mental revolution agenda.

He said Thursday (on 19 April) that the agenda was not appropriately carried out, adding that it he would [if his wish to be the next vice-President was granted and accepted] improve and take care of the agenda.

According to him, his party completely supports Jokowi's mental revolution agenda.

His statement suggested that he would appropriately carry out and establish the very agenda if he were granted and accepted to be the next vice-President.

Muhaimin Iskandar, who is also one of the People's Consultative Assembly (MPR) vice-Speakers, said that there were two factors to deal.

First, Jokowi's mental revolution agenda should have been referred to or based on Marhaenism, an Indonesian ideological basis founded by Indonesian First President and Founding Father Soekarno.

Secondly, the present situation in the country where the divided Muslims have been falsely informed or threatened to have to face with non-Indonesian Muslims.
