

INTISARI

Mutu pelayanan kesehatan akan menjadi baik kalau masing-masing profesi kesehatan memberikan pelayanan kepada pasien berdasarkan standar profesi, kode etika, sumpah profesi masing-masing, dan sesuai dengan peraturan perundang-undangan yang berlaku. Untuk menjamin mutu pelayanan kefarmasian yang diberikan kepada masyarakat, telah disusun Standar Pelayanan Kefarmasian di Apotek berdasarkan KepMenKes RI Nomor 1027/MenKes/SK/IX/2004.

Penelitian ini bertujuan untuk mengetahui gambaran pelaksanaan Standar Pelayanan Kefarmasian di Apotek berdasarkan KepMenKes RI Nomor 1027/MenKes/SK/IX/2004 di Kabupaten Sleman. Penelitian ini termasuk jenis penelitian non-eksperimental dengan rancangan penelitian deskriptif. Responden dalam penelitian ini adalah Apoteker di apotek-apotek Kabupaten Sleman yang bersedia mengisi kuisioner sebagai instrumen dalam penelitian ini. Analisis data dilakukan dengan statistik deskriptif.

Hasil penelitian menyatakan bahwa Standar Pelayanan Kefarmasian di Apotek berdasarkan KepMenKes RI Nomor 1027/MenKes/SK/IX/2004 belum dilaksanakan secara menyeluruh oleh Apoteker di apotek-apotek Kabupaten Sleman. Maka perlu peran pemerintah melalui Dinas Kesehatan, ISFI, dan perguruan tinggi farmasi dalam membina, membimbing, dan menyiapkan Apoteker untuk lebih meningkatkan pelayanan kefarmasian di apotek.

Kata kunci : Standar Pelayanan Kefarmasian, KepMenKes RI Nomor 1027/MenKes/SK/IX/2004, Apotek

ABSTRACT

The quality of health service will be good if every health profession gives service to the patient based on profession standard, ethic code, profession oath, according to the law and legal regulation. To guarantee the quality of pharmaceutical care which is given to society, it has been arranged The Pharmaceutical Care Standard at dispensary based on KepMenKes RI Nomor 1027/MenKes/ SK/IX/2004.

The aim of this research is to know the description of The Pharmaceutical Care Standard at Dispensary based on KepMenKes RI Nomor 1027/MenKes/SK/IX/2004 in Sleman regency. This research includes the kind of non experimental research with descriptive research plan. The respondents are pharmacists at the dispensaries in Sleman regency, which are ready to fill questionnaires as the instrument in this research. The data analysis is done with using descriptive statistics.

The result of research states that The Pharmaceutical Care Standard at Dispensary based on KepMenKes RI Nomor 1027/MenKes/SK/IX/2004 has not been done all yet by pharmacists at the dispensaries in Sleman regency. Therefore, it needs the role of government through Public Health Service, ISFI, and the faculty of pharmacy in guiding, giving direction and preparing pharmacists to increase more their pharmaceutical care at dispensary.
