## **ABSTRAK**

Penelitian ini adalah penelitian deskriptif yang bertujuan untuk mendapatkan gambaran mengenai sikap remaja putri terhadap eksibisionisme melalui *webcam* saat *chatting*. Metode yang digunakan adalah metode kuantitatif deskriptif. Penelitian dilakukan di Yogyakarta dengan subjek sebanyak 64 orang yang pernah melihat eksibisionisme melalui *webcam* saat *chatting*. Instrumen yang digunakan dalam penelitian ini adalah skala yang dibuat sendiri oleh peneliti. Pembuatan skala berdasarkan 3 aspek yaitu kognisi, afeksi, dan konasi. Keseluruhan aitem berjumlah 50 aitem. Analisis aitem menggunakan *Product Moment Pearson*. Estimasi reliabilitas dilakukan dengan menggunakan teknik *Cronbach Alpha* yang menghasilkan koefisien reliabilitas sebesar 0,978.

Hasil penelitian menunjukkan bahwa terdapat perbedaan yang signifikan antara mean empirik dari sikap terhadap eksibisionisme dengan mean teoritiknya ( $p = 0,00$ ). Dimana mean empirik lebih rendah dibanding mean teoritiknya. Maka dapat disimpulkan bahwa sikap remaja putri terhadap eksibisionisme melalui *webcam* saat *chatting* tergolong rendah.

*Kata Kunci: Sikap, Remaja Putri, Eksibisionisme*

## **FEMALE ADOLESCENT'S ATTITUDE TO EXIBISIONISM ON WEBCAM IN THE CHATTING**

### **ABSTRACT**

This research was aimed to know the tendency of female adolescent's attitude to exhibisionism students on *webcam* in the *chatting*. The method used in this research was quantitative method. The data gathered from this research was analyzed by descriptive statistic analysis. Research was conducted in Yogyakarta. The total subject in this research was 64 female adolescents. The instrument for this research was made by researcher, based on 3 attitude indicators: cognition, affective, conation. There were 50 items in the instrument. Items were analyzed using The Product Moment Pearson Correlation. Reliability is analyzed by Cronbach Alpha obtain of coefficient reliabilities of equal to 0,978.

The result showed there's a significant difference between the empiric mean of female adolescent's attitude and the theoretic mean ( $p = 0,00$ ). The empiric mean of the female adolescent's attitude were lower compared with theoretic mean.. The result showed that female adoescent's attitude to exhibisionism students on *webcam* in the *chatting* is low.

*Key Words: Attitude, Female Adolescent, Exhibisionism*
