

PERBEDAAN KESIAPAN KERJA ANTARA MAHASISWA YANG IKUT ORGANISASI DAN MAHASISWA YANG TIDAK IKUT ORGANISASI

Ina Utadi

ABSTRAK

Penelitian ini bertujuan untuk melihat perbedaan kesiapan kerja antara mahasiswa yang ikut organisasi dan mahasiswa yang tidak ikut organisasi. Hipotesis yang diajukan adalah mahasiswa yang ikut dalam organisasi merasa lebih siap untuk memasuki dunia kerja daripada mahasiswa yang tidak ikut dalam organisasi. Subjek penelitian ini adalah 100 orang yang terdiri dari 50 orang yang ikut dalam organisasi dan 50 orang yang tidak ikut organisasi. Mereka yang menjadi subjek adalah mahasiswa yang sedang menempuh matakuliah skripsi di Yogyakarta. Pengumpulan data yang digunakan dalam penelitian ini menggunakan skala persepsi kesiapan kerja. Reliabilitas skala persepsi kesiapan kerja diuji dengan menggunakan metode koefisien reliabilitas Alpha Cronbach dan diperoleh hasil 0,913 dari 40 aitem. Data dianalisis dengan menggunakan independent sample t-test. Hasil analisis data menunjukkan nilai p sebesar 0,296 ($p > 0,05$) yang berarti tidak ada perbedaan yang signifikan dalam hal persepsi kesiapan kerja antara mahasiswa yang ikut organisasi dan mahasiswa yang tidak ikut dalam organisasi.

Kata kunci: organisasi, kesiapan kerja, mahasiswa

THE DIFFERENCE OF WORK READINESS BETWEEN STUDENTS WHO WERE INVOLVED IN ORGANIZATION AND STUDENTS WHO WERE NOT INVOLVED IN ORGANIZATION

Ina Utadi

ABSTRACT

This study was aimed to see the difference of work readiness between students who were involved in organization and students who were not involved in organization. The presented hypothesis was that the students who were involved in organization felt readier to enter the working world than the students who were not involved in any organization. The subjects of this study were 100 students, consisting 50 students who were involved in organization and 50 students who were not involved in organization. Those who became the subjects were the students who were taking the undergraduate thesis in Yogyakarta. The data collection used in this study was the work readiness perception scale. The work readiness perception scale reliability was tested with cronbach alpha reliability coefficient method. The result was 0,913 from 40 items. The data was analyzed with t-test independent sample. The result showed that p value was 0,296($p > 0.05$) which meant there was no significant difference in terms of work readiness between students who were involved in organization and students who were not involved in organization.

Keywords: organization, work readiness, college students
