

INTISARI

Telah dilakukan dua buah eksperimen spektroskopi pada berkas atom Samarium dengan metode *Laser Induced Fluorescence* (LIF). Dari pengukuran panjang gelombang dan tinggi sinyal, delapan buah garis transisi yang teramati dapat diidentifikasi sebagai transisi:

551,75 nm:	$4f^6 6s^2$	7F_1	6	$4f$	$6s 6p$	5D_2
551,77 nm:	$4f^6 6s^2$	7F_4	4	$4f^5 5d 6s^2$	$^7F^o$	
551,94 nm:	$4f^6 6s^2$	7F_5		$4f^6$	$(^7F) 6s 6p (^3P^o)$	$,7=4$
555,05 nm:	$4f^6 6s^2$	7F_1		$4f^5 (^6H^o)$	$5d 6s 2 ^7F^o$	
555,19 nm:	$4f^6 6s^2$	7F_3		$4f^5 (^6H^o)$	$5d 6s 2 ^7F^3$	
557,64 nm:	$4f^6 6s^2$	7F_1		$4f^6 (^7F)$	$6s 6p (^1P^o)$	$J=1$
557,72 nm:	$4f^6 6s^2$	7F_5	1	$4f^6 (^7F)$	$6s 6p (^3P^o)$	$^7F^o$

Dari hasil pengamatan tersebut dapat dibuat skema tingkatan-tingkatan tenaga yang terlibat.

ABSTRACT

Using the method of laser induced fluorescence in beam spectroscopy on Samarium, 8 transition lines have been measured. From the wavelengths and the relative intensities of the transitions, the observed lines have been identified as:

551,75 nm:	$4f^6 6s^2$	7F_1	4					
551,77 nm:	$4f^6 6s^2$	7F_4	4	$4f^6 6s 6p$	$^{5D}2$	○		
				$4f^5 5d 6s 2$	7F_4	○		
551,94 nm:	$4f^6 6s^2$	7F_5	4	$4f^6$	$(^7F) 6s 6p$	$(^3P^o)$	J=4	,
555,05 nm:	$4f^6 6s^2$	7F_1	4	$4f^5$	$(^6H^o)$	$5d 6s^2$	7F_0	0
555,19 nm:	$4f^6 6s^2$	7F_3	4	$4f^5$	$(^6H^o)$	$5d 6s 2$	7F_3	
557,64 nm:	$4f^6 6s^2$	7F_1	4	$4f^6$	(^7F)	$6s 6p$	$(^1P^o)$	J=1
557,72 nm:	$4f^6 6s^2$	7F_5	4	$4f^6$	(^7F)	$6s 6p$	$(^1P^o)$	7F_6

Using the observed transitions, an energy level scheme has been made involving energy levels connected by the transitions.
