

ABSTRAK

Penelitian ini adalah penelitian deskriptif yang bertujuan untuk mengetahui pola perilaku heteroseksual remaja putri yang tinggal di asrama putri dan sekolah di sekolah homogen putri. Ada 4 pola perilaku heteroseksual yang ingin diungkap, yaitu: 1). berkenalan, 2). tertarik, 3). berkencan, 4). berpacaran.

Metode yang digunakan dalam penelitian ini adalah skala dengan bentuk jawaban dikotomi (Ya – Tidak) yang diberi skor 1 dan 0. Dari hasil uji coba, item yang sah memiliki r_{xy} 0,81 – 0,882; koefisien reliabilitas 0,897; dan koefisien reproduksibilitas 0,91.

Penelitian dilakukan di Asrama SMU STELLA DUCE I, Samirono, Jogjakarta. Dari hasil penelitian diperoleh data: 1). Pola Perilaku Berkenalan, yang mengetahui nama teman pria sebesar: 100%, mengetahui rumah: 78,9%, mengetahui tempat sekolah/kerja: 98,6%, mengetahui teman-temannya: 81,7%, dan mengetahui jumlah saudara: 73,2%; 2) Pola Perilaku Tertarik, yang merasa senang berdekatan dengan teman pria: 80,3%, senang bila membayangkan: 62,0%, membicarakan teman prianya saat berbincang-bincang dengan teman lain: 70,4%, menelepon meskipun tidak ada hal penting yang akan dibicarakan: 35,2%, teringat wajah teman prianya di waktu senggang: 50,7%, kadang memimpikan: 45,1%, dan selalu ingin dekat dengan teman prianya: 52,1%; 3). Pola Perilaku Berkencan, yang menceritakan masalah kepada teman prianya: 71,8%, menerima ajakan untuk pergi berdua: 62,0%, dan mengajak untuk pergi ke suatu tempat: 35,2%; 4). Pola Perilaku Berpacaran, yang berpegangan tangan saat duduk berdua: 26,8%, berpelukan di saat-saat tertentu: 22,5%, saling mencium pipi/kening: 29,6%, dan berciuman bibir: 9,9%. Berdasarkan skor yang dimiliki subyek, skor tinggi dimiliki oleh 23 subyek, skor sedang 34 subyek, dan skor rendah dimiliki 14 subyek.

Dari hasil penelitian dapat disimpulkan bahwa meskipun subyek hidup di asrama yang dianggap ketat, tetapi mereka tetap memiliki teman pria meskipun tiap anak memiliki pencapaian pola perilaku heteroseksual yang berbeda.

ABSTRACT

This research is descriptive research that aimed to know heterosexuality models by female adolescent who's live in female dormitory at non-coeducational school. These heterosexuality models are follows: (1) be acquainted with her boyfriend, (2) extracted with her boyfriend, (3) dating, and (4) engaged.

Method of this research used scale with dichotomous (Ya-Tidak) answer model that scored 1-0. From the scale, it obtained accurate items with rxy of 0,817-0,882, coefficient of reliability was 0,897, and coefficient of reproducibility (Kr) was 0,91.

The research doing at female dormitory of Stella Duce I high school, Samirano, Jogjakarta. The result of this research, could see the heterosexuality models in female dormitory, those are: (1) be acquainted with her boyfriend, who knows name: 100%, knowing his home: 78,9%, knowing his school/working places: 98,6%, knowing his brother and sisters: 73,2%.
