

## HUBUNGAN ANTARA CITRA DIRI GENITAL DAN KEPUASAN SEKSUAL PADA PEREMPUAN

*Putriyani Setiabudi*

### ABSTRAK

Penelitian ini bertujuan untuk mengetahui hubungan antara citra diri genital dan kepuasan seksual pada perempuan. Hipotesis dalam penelitian ini adalah ada hubungan antara citra diri genital dan kepuasan seksual. Subjek dalam penelitian ini berjumlah 111 perempuan yang telah melakukan hubungan seksual. Citra diri genital dan kepuasan seksual diukur dengan skala *Female Genital Self-Image Scale* (FGSIS) yang dikembangkan oleh Herbenick, Schick, Recee, Sanders, Dodge, dan Fortenberry (2011) dan *New Sexual Satisfaction Scale* (NSSS) yang dikembangkan oleh Stulhofer, Busko, dan Brouillard (2010) dalam bentuk skala likert. Skala penelitian telah diadaptasi ke dalam Bahasa Indonesia oleh peneliti dengan panduan dari *Guideline for The Cross-Cultural Adaptation Process* oleh Beaton, Bombardier, Guillemin, dan Ferraz (2000). Skala FGSIS memiliki koefisien reliabilitas sebesar 0,623 dan skala NSSS memiliki koefisien reliabilitas sebesar 0,975. Teknik analisis data menggunakan uji korelasi *Product Moment Pearson*. Hasil penelitian diperoleh nilai korelasi sebesar 0,419 ( $p < 0,05$ ) yang artinya ada hubungan yang cukup kuat antara citra diri genital dan kepuasan seksual.

Kata kunci : citra diri genital, kepuasan seksual, perempuan, seksualitas

## THE CORRELATION BETWEEN GENITAL SELF-IMAGE AND SEXUAL SATISFACTION IN WOMEN

*Putriyani Setiabudi*

### ABSTRACT

This study aims to determine the correlation between genital self-image and sexual satisfaction in women. The hypothesis of this study is that there is a correlation between genital self-image and sexual satisfaction. The subjects of this study amounted to 111 women who have had sexual intercourse. Genital self-image and sexual satisfaction are measured by the Female Genital Self-Image Scale (FGSIS) scale developed by Herbenick, Schick, Recee, Sanders, Dodge, and Fortenberry (2011) and New Sexual Satisfaction Scale (NSSS) developed by Stulhofer, Busko, and Brouillard (2010) in the form of a Likert scale. The research scale has been adapted into Indonesian by the researcher with guidance from the Guidelines for the Cross-Cultural Adaptation Process by Beaton, Bombardier, Guillemin, and Ferraz (2000). The FGSIS scale has a reliability coefficient of 0.623 and the NSSS scale has a reliability coefficient of 0.975. The data analysis technique applies Pearson Product Moment correlation test. The result of the study is obtained a correlation value of 0.419 ( $p < 0.05$ ) which means that there is a fairly strong correlation between genital self-image and sexual satisfaction.

Keywords: genital self-image, sexual satisfaction, women, sexuality
