This study aims to assess the potential use of Zahir Accounting Flexy Trade software in CV Karya Wahana Sentosa. Related to that, also aims to assess the potential use of Accurate 5 Deluxe Edition software in CV Karya Wahana Sentosa.

A furniture manufacturing company, named CV Karya Wahana Sentosa was chosen as a subject in this study. The study constitutes a case study approach with experimental research method. This research was also a laboratory experimental research type. The data were obtained through several techniques, which were interview, observation, and documentation technique. In addition, five steps were undertaken to enable data analysis. First step was descriptive analysis, it was then followed by master data adjustment and creation of purposefully illustrated cases for software simulation. The next step consisted of assessment of each software through PIECES analysis. The final step was conducted by comparing the result of PIECES assessment on each software.

Based on the result of this study, it can be seen that Accurate 5 Deluxe Edition software turns out to be more potential to be used at CV Karya Wahana. The results of this study are intended as a form of recommendation for CV Karya Wahana Sentosa. The recommendation are closely related to use decisions, and reference literature which will give, enriching insight and will become a reference for students to develop further research.
