Writing skill is one of the hardest skills to master for 11<sup>th</sup> grade students of SMAN 4 Yogyakarta in academic year of 2019/2020. Further, online comic strips are considered as the suitable media for teaching writing in 11<sup>th</sup> grade of SMAN 4 Yogyakarta.

This research aimed to find out how effective comic strips improve students' writing skills and describe the implementation of comic strips as the learning media using cause and effect materials to improve 11<sup>th</sup> grade students' writing skills in SMAN 4 Yogyakarta.

The researcher formulated two research questions in this research, namely  
(1) How is the implementation of comic strip to improve students' writing skills?  
(2) How effective is the use of comic strips to improve students' writing skills?

The researcher employed Classroom Action Research (CAR) as the methodology to answer the research questions. The participants of the research were 32 students of XI MIPA 4 of SMAN 4 Yogyakarta. The researcher collected the data using several instruments, namely observation checklist, field notes, tests, questionnaire, and interview guidelines.

The first finding showed that the implementation of comic strips in writing process involved two cycles of CAR from Kemmis and Mc Taggart (1988). Each cycle covered four stages, namely planning, action, observation, reflection. The second finding showed that the implementation of comic strips in writing process was effective. That was proved by the improvement among the pre-test, post-test 1, and post-test 2. The results of the questionnaire also proved that the students also had positive perceptions on the implementation of comic strips in improving their writing skills.

In conclusion, the implementation of comic strips as the media could help students to improve their writing skills. The students could understand the materials well, generate more their ideas, and pour the ideas into their creative writing. In addition, the students were more active and involved in the learning activity. Overall, the research revealed that comic strips can be implemented in writing process and comic strips can help students in improving their writing skills.
