This study aimed to examine the influence(s) of compensation, work distribution, and working environment on the BPR Artha Perwira employees' work performance. The population in this study included all of the employees working at PD. BPR Artha Perwira and there were 43 respondents for the samples. The test instruments used for this study were Validity Test and Reliability Test. The analysis technique used in this study was the Multiple Linear Regression, while the data processor was the SPSS Statistics 25 software. The results showed that 1) compensation, working environment, and work distribution simultaneously influenced the employees' work performance, 2) compensation only partially influenced the employees' work performance, 3) working environment only partially influenced the employees' work performance, and 4) working distribution did not influence the employees' work performance.

Keywords: Compensation, Work Distribution, Working Environment, Work Performance
