This research aims to know the influence of human resources management practice on employee performance. The human resources management practice observed in this research included human resource planning, recruitment, training and compensation development, performance management, and employee relation. This research was conducted from April to May, 2020 at Santika Premiere Hotel, Yogyakarta.

The sampling technique used in this study was a purpose sampling technique. The number of respondents was 35 employees, who have worked for 1 year or more on average. Data analysis techniques used were multiple linear regression, t test and f test. The data which consist of primary and secondary data were processed with MS. Excel and SPSS 26.

The results of this research showed that: 1). HR planning had no influence on employee performance, 2) recruitment had no influence on employee performance, 3) training and development had no influence on employee performance, 4) compensation had no influence on employee performance, 5) performance management influenced employee performance, 6) relationships between employees did not influence employee performance, 7) HR planning, recruitment, training and development, performance management, relationships between employees should be done simultaneously in order to improve employee performance.

Keyword : human resource planning, recruitment, training and compensation development, performance management, employee relations with employee performance
