

ABSTRAK

HUBUNGAN PERSEPSI TENTANG *FULL DAY SCHOOL* DENGAN STRES AKADEMIK, KARAKTER, DAN MINAT BELAJAR PESERTA DIDIK

Yuliana Stevania Djali
Universitas Sanata Dharma
2020

Penelitian ini bertujuan untuk mengetahui apakah terdapat hubungan persepsi siswa tentang *full day school* dengan stres akademik, karakter, dan minat belajar peserta didik. Penelitian ini merupakan penelitian *ex-post facto* yang dilaksanakan pada bulan Mei-Juni 2020. Populasi penelitian adalah seluruh peserta didik di SMA Stella Duce 2 Yogyakarta. Sampel penelitian sejumlah 129 siswa adalah siswa kelas XI IPA, IPS, dan Bahasa yang diambil dengan teknik *purposive sampling*. Data dikumpulkan dengan menggunakan kuesioner dan dianalisis dengan uji korelasi *Product Moment Pearson*.

Hasil penelitian ini menunjukkan bahwa : (1) ada hubungan persepsi tentang *full day school* dengan stres akademik dengan nilai *Correlation coefficient* sebesar +0,202 dan nilai signifikansi (*2-tailed*) sebesar 0,022; (2) ada hubungan persepsi tentang *full day school* dengan karakter peserta didik dengan nilai *Correlation coefficient* sebesar +0,381 dan nilai signifikansi (*2-tailed*) sebesar 0,000; (3) ada hubungan persepsi tentang *full day school* dengan minat belajar dengan nilai *Correlation coefficient* sebesar +353 dan nilai signifikansi (*2-tailed*) sebesar 0,000.

Kata kunci: persepsi tentang *full day school*, stres akademik, karakter, minat baca.

ABSTRACT

THE CORRELATION BETWEEN PERCEPTION ON FULL DAY SCHOOL AND THE STUDENTS' ACADEMIC STRESS, CHARACTERS, INTERESTS IN LEARNING

2020

This study aimed to determine whether there were correlations between students' perceptions of full day school and academic stress, character, and interests in learning. This research was an ex-post facto study conducted in May- June 2020. The population was all students of Stella Duce 2 Yogyakarta High School. The research samples consisted of 129 students from Grade XI of Physical Sciences, Social Sciences, and Language Study and were taken with a purposive sampling technique. Data were collected using questionnaires and analyzed by Pearson Product Moment correlation test.

The results of this study indicated that: (1) there was a correlation between perception on full day school and academic stress with the correlation coefficient value of +0.202 and the significance value (2-tailed) of 0.022; (2) there was a correlation between perception on full day school and the character of students with the correlation coefficient value of +0.381 and the significance value (2-tailed) of 0,000; and (3) there was a correlation between perception on full day school and learning interest with the correlation coefficient value of +353 and the significance value (2-tailed) of 0,000.

Keywords: Perception on full day school, academic stress, character, interest in reading.
