Dear Mr. Ignatius Pranowo:

Thank you for uploading your paper 1570748203 (*Smart monitoring system using ESP8266 for maintenance of production machines*) to **Indonesian Journal of Electrical Engineering and Computer Science (a Scopus indexed journal)**. The paper is of type application/pdf and has a length of 441476 bytes.

You can modify your paper at https://edas.info/showPaper.php?m=1570748203 and see all your submissions at https://edas.info/index.php?c=28523 using the EDAS identifier dradjad@pmsd.ac.id

Regards,
Assoc. Prof. Dr. Tole Sutikno
Editor-in-Chief,
Indonesian Journal of Electrical Engineering and Computer Science
http://ijeecs.iaescore.com
email: ijeecs@iaescore.com, ijeecs.iaes@gmail.com

Online paper submission: https://edas.info/N28523

-- Please strictly use & follow to the template manuscripts: http://iaescore.com/gfa/ijeecs.docx to avoid delays
-- Similarity score of your final manuscript must be less than 25%
-- Original research paper: Min number of references is 25 sources (included min 20 recent journal articles).
-- Review paper: Min number of references is 50 sources (included min 40 recent journal articles).

==

Dear Mr. Ignatius Pranowo,

After careful review, your paper ID #1570748203, entitled "Smart monitoring system using ESP8266 for maintenance of production machines" for "Indonesian Journal of Electrical Engineering and Computer Science" requires MAJOR REVISIONS. For improving your paper, please read our published papers and cite them as appropriate. Search within https://www.scopus.com/results/results.uri?sort=plf-f&src=s&sid=028217d99e516e69288d95d6f7c6fdc5&sot=a&sdt=a&sl=104&s=SOURCE-ID+%2821100258382%29+OR+SOURCE-ID+%2821100373959%29+OR+SOURCE-ID+%2821100826382%29+OR+SOURCE-ID+%2821100901206%29&origin=searchadvanced&editSaveSearch=&txGid=7593add58cbc5ed145d2e4ac71c010f9 in the upper left side by typing your keywords to find related papers. For your information, according to international regulations, similarity score of camera-ready paper must be less than 25%. Single author is PROHIBITED. The Technical Program Committee (TPC) will check whether the revision already address the reviewers' comments.

Indonesian Journal of Electrical Engineering and Computer Science (p-ISSN: 2502-4752, e-ISSN: 2502-4760) http://ijeecs.iaescore.com is a monthly peer reviewed International Journal in English, indexed by Scopus (CiteScore 2019: 1.4, SNIP 2019: 0.649, SJR 2019: 0.21, Q3 on Electrical and Electronic Engineering, Q3 on Computer Networks and Communications, Q3 on Hardware and Architecture, Q3 on Signal Processing, and Q3 on Control and Optimization), EI (INSPEC, IET), Google Scholar Metrics, ProQuest, EBSCO, BASE, OALib, SHERPA/RoMEO etc. You are asked to submit a revised full manuscript, according to the comment from reviewers.

The reviews are below or can be found at https://edas.info/showPaper.php?m=1570748203, using your EDAS login name dradjad@pmsd.ac.id.

URGENT!!

- Each citation should be written in the order of appearance in the text in square brackets. For example, the first citation [1], the second citation [2], and the third and fourth citations [3,4]. When citing multiple sources at once, the preferred method is to list each number separately, in its own brackets, using a comma or dash between numbers, as such: [1], [3], [5] or [4-8]. It is not necessary to mention an author's name, pages used, or date of publication in the in-text citation. Instead, refer to the source with a number in a square bracket, e.g. [9], that will then correspond to the full citation in your reference list.
Examples of in-text citations:
This theory was first put forward in 1970 [9].
Zadeh [10] has argued that...
Several recent studies [7], [9], [11-15] have suggested that....
...end of the line for my research [16].

-- Similarity score of your final manuscript must be less than 25%
-- Original research paper: Min number of references is 25 entries/sources (included min 20 recent journal articles).
-- Review paper: Min number of references is 50 entries/sources (included min 40 recent journal articles).

Please upload the revised paper using EDAS on the "Revision" upload button within 8 weeks.

Failing to do proper revision may lead to the rejection of your paper.

Thank you for your cooperation.

Best Regards, Assoc. Prof. Dr. Tole Sutikno
Editor-in-Chief,
Indonesian Journal of Electrical Engineering and Computer Science

Review 1

Novelty and Contribution: Rate the degree of scientific contribution provided by this paper. Do the authors offer new findings? Do they give proper explanation and detailed analysis?

Accept (9)

Paper Presentation: What is your evaluation on the quality of presentation from this paper (e.g. figures, tables, formats, etc.)?

Accept (9)

Detailed Comments: Please provide detailed comments that will be helpful to the TPC for assessing the paper. Also provide feedback to the authors.

Review of the article "Smart monitoring system using ESP8266 for maintenance of production machines" submitted to the Indonesian Journal of Electrical Engineering and Computer Science.

1. In this paper, the authors have investigated the development of a smart monitoring system for the maintenance performance of production machines.
2. For this, the monitoring system has supported maintenance work to be more effective and facilitated better record keeping of machine conditions from time to time. This is because the data is recorded automatically and can be accessed online anywhere and anytime.
3. The human error in reporting machine maintenance history does not occur again, and the speed and accuracy in identifying failure are better. In this case, there is a reduction in maintenance work time (calling and reporting) of up to 50%.
4. The paper is well-organized and easy to follow. The authors have presented a thorough discussion of the results.
5. However, I suggest the authors revise the language of the article slightly.

Recommendation: Your overall rating.

Accept (9)

Review 2

Novelty and Contribution: Rate the degree of scientific contribution provided by this paper. Do the authors offer new findings? Do they give proper explanation and detailed analysis?

Accept (9)

Paper Presentation: What is your evaluation on the quality of presentation from this paper (e.g. figures, tables, formats, etc.)?

Accept (9)

Detailed Comments: Please provide detailed comments that will be helpful to the TPC for assessing the paper. Also provide feedback to the authors.

This manuscript misses the literature review section, so the authors shall provide this section. In addition, proofreading is highly needed.

Recommendation: Your overall rating.

Borderline Accept (5)

Detailed Comments: Please provide detailed comments that will be helpful to the TPC for assessing the paper. Also provide feedback to the authors.

The paper needs improvement in the body of knowledge, English language grammar, references.

Recommendation: Your overall rating.

Borderline Accept (5)

Double checklist for preparing your revised paper

(1) TEMPLATE, Please strictly use and follow to the template Manuscripts (Word Format): http://iaescore.com/gfa/ijeecs.docx (or http://iaescore.com/gfa/ijeecs.rar for LateX format)

(2) Authors are suggested to present their articles with IMRaD sections structure (outline): Introduction - The Proposed Method/Algorithm/Procedure specifically designed (optional) - Research Method - Results and Discussion – Conclusion. Authors may present complex proofs of theorems or non-obvious proofs of correctness of algorithms after introduction section (obvious theorems & straightforward proofs of existing theorems are NOT needed).

(3) Introduction section: explain the context of the study and state the precise objective. An Introduction should contain the following three parts:

- Background: Authors have to make clear what the context is. Ideally, authors should give an idea of the state-of-the art of the field the report is about.
- The Problem: If there was no problem, there would be no reason for writing a manuscript, and definitely no reason for reading it. So, please tell readers why they should proceed reading. Experience shows that for this part a few lines are often sufficient.
- The Proposed Solution: Now and only now! - authors may outline the contribution of the manuscript. Here authors have to make sure readers point out what are the novel aspects of authors work. Authors should place the paper in proper context by citing relevant papers. At least, 15 references (recently journal articles) are referred in this section.

(4) Method section: the presentation of the experimental methods should be clear and complete in every detail facilitating reproducibility by other scientists.

(5) Results and discussion section: The presentation of results should be simple and straightforward in style. This section report the most important findings, including results of statistical analyses as appropriate and comparisons to other research results. Results given in figures should not be repeated in tables. This is where the author(s) should explain in words what they discovered in the research. It should be clearly laid out and in a logical sequence. This section should be supported suitable references.

(6) (URGENT)!!! About Figures & Tables in your manuscript:

- Because tables and figures supplement the text, all tables and figures should be REFERENCED in the text. Authors MUST EXPLAIN what the reader should look for when using the table or figure. Focus only on the important point the reader should draw from them, and leave the details for the reader to examine on her own.
- Tables are to be presented with single horizontal line under: the table caption, the column headings and at the end of the table. All tables are produced by creating tables in MS Word. Captured tables are NOT allowed.
- All figures MUST be prepared by yourself and presented in HIGH QUALITY images!!!

(7) Conclusion section: Summarize sentences the primary outcomes of the study in a paragraph. Are the claims in this section supported by the results, do they seem reasonable? Have the authors indicated how the results relate to expectations and to earlier research? Does the article support or contradict previous theories? Does the conclusion explain how the research has moved the body of scientific knowledge forward? CITATIONS in this section is NOT allowed!!!

(8) Most importantly, please ensure the similarity score is less than 25%. You can refer to EDAS to see the similarity score of your paper. Any paper with a similarity score of more than 25% will be dropped. Please make sure your revised paper follow this rule. If the similarity score of final version is more than 25%, the TPC has the right to cancel the paper to be presented at IJEECS 2021 Batch #2.

(9) Please ensure the maximum page of your final paper is 8-page, but still allowed up to 12 pages (required to pay an extra fee).

Final Paper ID# 1570748203 and Payment Receipt?

==
===============

Dear Prof/Dr/Mr/Mrs: Ignatius Deradjad Pranowo and Dian Artanto,

Congratulations!! Your paper entitled "Smart monitoring system using ESP8266 for maintenance of production machines", ID# 1570748203, authors: Ignatius Deradjad Pranowo and Dian Artanto for Indonesian Journal of Electrical Engineering and Computer Science has been ACCEPTED and will be published for forthcoming issue. The Indonesian Journal of Electrical Engineering and Computer Science (p-ISSN: 2502-4752, e-ISSN: 2502-4760) is a monthly peer reviewed International Journal in English, indexed by Scopus (CiteScore 2019: 1.4, SNIP 2019: 0.649, SJR 2019: 0.21, Q3 on Electrical and Electronic Engineering, Q3 on Computer Networks and Communications, Q3 on Hardware and Architecture, Q3 on Signal Processing, and Q3 on Control and Optimization), EI (INSPEC, IET), Google Scholar Metrics, ProQuest, EBSCO, BASE, OALib, SHERPA/RoMEO etc. The aim of this journal is to publish high-quality articles dedicated to all aspects of the latest outstanding developments in the field of electrical engineering. Its scope encompasses the applications of Telecommunication and Information Technology, Applied Computing and Computer, Instrumentation and Control, Electrical (Power), and Electronics Engineering.

For your information, according to international regulations, similarity score of camera-ready paper should be less than 25% (current similarity score is %). Single author is NOT allowed. The Editor(s) will check whether the final version has been performed and already address the reviewers' comments or not. Failing to do proper revision may lead to the rejection of your paper.

Please submit your final camera ready paper, similarity checking report (by iThenticate or Turnitin software) along with your payment receipt to: ijeecs.iaes@gmail.com within 4 weeks.

I look forward for your response

Sincerely yours,
Assoc. Prof. Dr. Tole Sutikno

Borderline Accept (5)

> *** Detailed Comments: Please provide detailed comments that will be helpful to the TPC for assessing the paper. Also provide feedback to the authors.

1. This statement needs to be corrected, "Maintenance is an activity that needs to maintain and return a machine to its best condition and work optimally. " The rest of the abstract should also be rewritten for effective grammar and syntax.

2. Please check the main paper for grammar and syntax as well.

3. Siren is misspelled in Figure 3.

4. Please include future work, if any.

5. Implementation and data collection is very good compared to a lot of papers that suffer in terms of implementation and data collection, however, the importance or necessity for ESP822 is not well highlighted, in fact, there is no need to be chip or architecture-specific for PdM. I recommend removing that from the title, and also detailing that any comparable competent processor and architecture can accomplish this result.

6. The authors should also attempt to expand on what is novel about the current work, for the benefit of the audience.

To: "T. Sutikno Ijeecs Editor" <ijeecs@iaescore.com>

Dear Dr. Tole Sutikno
Editor-in-Chief,

I sent the final camera-ready paper, Turnitin similarity check, and proof of payment transfer to complete my paper acceptance requirements with ID 1570748203 (Smart monitoring system uses ESP8266 for maintenance of production machines). Furthermore, I need that an invoice is provided as proof of payment for the APC (article publication charge) fee. I need the invoice as an accountability report to the university finance department for the use of funds as payment for this paper. Hopefully, the invoice can be sent to my email and can I receive it in this week. First of all, I thank you very much for your help and cooperation.

Best regards,
Ignatius Deradjad Pranowo
