ABSTRACT

*This undergraduate thesis is entitled **THE ROLE OF PARENTS' ASSISTANCE TOWARDS THE DEVELOPMENT OF CHILDREN'S FAITH IN A CATHOLIC FAMILY AT THE WORKERS OF SANTO YUSUF PARCHOUSE OF GONDANGWINANGUN**. The author chose this title based on his concern for the role of parental assistance in Catholic families in the Santo Yusuf Parish of Workers Gondangwinangun. The author focuses this thesis into 3 parts. How do parents realize their duties and responsibilities to assist children's faith development in St. Parish Yusuf Worker Gondangwinangun? What factors support and hinder the implementation of the role of parental assistance for the development of children's faith? What support and catechesis are expected to assist parents in realizing the role of mentoring in the development of children's faith in Catholic families? The author uses a naturalistic descriptive qualitative research method through observation, document review, and interviews with 18 informants. Based on the research, parents stated that the role of parental assistance is the appreciation of the marriage promise and a form of responsibility for the call of holiness. From the family, children know basic prayers, acts of love, and examples of the virtues of the Catholic faith. Parents get support from family, parish, school, and community. In addition, they found obstacles in the form of difficulties in sharing time with children, lack of enthusiasm in accompanying children, technological developments, and relationships that resulted in children being immersed in their world. The author proposes that the parish pays attention to parents through various Catholic family catechesis activities that are packaged in stages and in the long term.*
