This thesis is titled "History of the Catholic Church of the Parish of Saint John the Apostle Pringwulung Yogyakarta Years 1998 - 2020". This study answers 3 main problems, namely: (1) description of the establishment of the Catholic Church of St. John the Apostle Pringwulung, (2) the development of the Catholic Church of St. John the Apostle Pringwulung, (3) the important role of the Catholic Church of St. John Rasul Pringwulung Parish in the community.

The method used by the author is the historical method, which includes four stages. The data used for this writing were obtained from written sources, namely literature studies, research archives, Church documents, and oral sources obtained from interviews with respondents.

The Catholic Church of St. Jhon the Apostle Pringwulung Yogyakarta is the result of the expansion of the Catholic Church of the Parish of Christ the King of Baciro, before becoming a parish of Mrican Stasi people where every Sunday people celebrated the eucharist in the chapel of the Sanata Dharma University campus. Given that the number of people who are Catholics is increasing, in 1998 a parish was officially established in Pringwulung, Caturtunggal Village, Sleman Regency, Yogyakarta. The Catholic Church of Saint John the Apostle Pringwulung experienced an increase in the number of people and was successful. The work program was running smoothly, but it was also inseparable from factors that hindered the development of the parish, namely young people who were not very active in being involved in church life, and the existence of a work program had been determined not to carry it out. well. Although there are several factors that hinder the Church of Saint John the Apostle Pringwulung, the people continue to enliven and develop the Christian faith through living a church and working through pastoral care.

Keywords: Pastoral service, parish development.
