This study aims to 1) describe the level of interest in participating in individual counseling services in class VIII students of SMP Stella Duce 2 Yogyakarta; 2) Identify the items of interest in participating in individual counseling that have the lowest score and the proposed topics of guidance and counseling services needed for class VIII students of SMP Stella Duce 2 Yogyakarta Academic Year 2022/2023.

This type of research uses quantitative. The research subjects were 56 grade VIII students of SMP Stella Duce 2 Yogyakarta. Data were collected using a scale of student interest following individual counseling (16 valid items $\alpha = 0.603$) which was tested on 39 grade VIII students of SMP Stella Duce 2 Yogyakarta. After testing the items that failed were then revised so that there were 44 items that were used as research. The data analysis technique uses descriptive analysis.

The results showed that: 1) there were 7 students (12.5%) who had a high level of interest in participating in individual counseling services, 47 students (83.9%) who had a moderate level of interest in participating in individual counseling services, 2 students (3.6%) have a low level of interest in following individual counseling services. It can be concluded that the interest in participating in individual counseling services for class VIII students of SMP Stella Duce 2 Yogyakarta for the 2022/2023 Academic Year is in the moderate category. 2) Based on the results of the analysis of the acquisition of low item scores on interest in participating in individual counseling services, there are 3 aspects, namely cognitive aspects, affective aspects, and conative aspects which are used as a reference for preparing the topic of guidance and counseling services.
