

ABSTRAK

Hedijati, Rachella Eka P. 2023. Perbedaan *Self – Perceived Employability* antara Mahasiswa Magister Sains Psikologi dan Magister Psikologi Profesi. *Skripsi*. Yogyakarta: Psikologi, Fakultas Psikologi, Universitas Sanata Dharma.

Penelitian ini bertujuan untuk melihat perbedaan *self perceived employability* pada mahasiswa magister sains psikologi dan magister psikologi profesi. Hipotesis penelitian yang diajukan dalam penelitian ini yaitu terdapat perbedaan *self perceived employability* pada mahasiswa magister sains psikologi dan magister psikologi profesi. Pengumpulan data dilakukan dengan menyebarkan kuesioner *self perceived employability* kepada 224 partisipan berusia 23-35 tahun yang sedang menempuh pendidikan magister psikologi di Universitas Negeri dan Swasta. Uji analisis yang digunakan dalam penelitian ini menggunakan uji beda *Mann Whitney* dan diperoleh nilai signifikansi sebesar 0,004 ($p < 0,05$) yang artinya hipotesis pada penelitian ini diterima. Sehingga, terbukti ada perbedaan yang signifikan pada *self perceived employability* antara mahasiswa magister sains psikologi dengan mahasiswa magister psikologi profesi.

Kata kunci: magister psikologi profesi, magister sains psikologi, *self perceived employability*,

ABSTRACT

Hedijati, Rachella Eka P. 2023. Differences in Self-Perceived Employability Between Students in Master of Psychological Science & Student in Master of Professional Psychology. *Skripsi*. Yogyakarta: Psikologi, Fakultas Psikologi, Universitas Sanata Dharma.

This study aims to look at the differences in self-perceived employability among students in Master of Psychological Science and Master of Professional Psychology. The research hypothesis proposed in this study is that there is differences in self-perceived employability in master of psychological science students and master of professional psychology students. The self-perceived employability questionnaires was distributed to 224 participants aged 23-35 years who were studying Master of psychology at public university and private university. This study used the Mann Whitney test for hypothetical testing and it was found that the significance value of $p = 0.004$ ($p < 0.05$). This means that the hypothesis in this study was accepted. The results showed that there is a significant difference in self-perceived employability between master of psychological science students and master of professional psychology students.

Keywords: master of psychological science, master of professional psychology, self perceived employability
