The title of this thesis is “CONTENT DESIGN OF THE RESURRECTION AND ASCENSION OF JESUS TO HEAVEN BASED ON TECHNOLOGICAL PEDAGOGICAL AND CONTENT KNOWLEDGE (TPACK)”. This research aims to design content on the resurrection and ascension of Jesus to heaven based on technological pedagogical and content knowledge. Catholic Religious Education and Character Education are integral parts of faith education. Faith education involves the proclamation of the Word through active faith communication to develop the participant’s faith comprehensively, enabling them to resemble the person of Jesus. The significance of Jesus resurrection and ascension lies in victory over death, justification, liberation from sin, and the gateway to a new life, divine glory, Messianic power, and hope for a return to the Father through Jesus. The resurrection and ascension of Jesus form the foundation of Christian faith, conveyed through the integration of technological pedagogical and content knowledge. Technological pedagogical and content knowledge elucidates the interaction of knowledge between content, pedagogy, and technology. This research design employed is Research and Development with the ASSURE approach for Catholic students in the X grade at SMA Negeri 3 Klaten, totaling 24 individuals. Data collection was carried out through observation, questionnaires, pre-test, and post-test. Data analysis utilized Paired Sample t-Test with the assistance of SPSS version 26 for Windows. The research result indicates an improvement and stability in student’s learning outcomes. This improvement and stability are observed from the pre-test and post-test result. The 2-tailed significance shows a value of 0,000 which is less than 0,05 indicating that TPACK has a significant impact.
