

**HUBUNGAN ANTARA *PERCEIVED SOCIAL SUPPORT*  
DAN RESILIENSI AKADEMIK PADA TARUNA AKADEMI MILITER**

**ABSTRAK**

Putri, Verena Mutiara Ika. 2023. Hubungan Antara *Perceived Social Support* Dan Resiliensi Akademik Pada Taruna Akademi Militer. *Skripsi*. Yogyakarta: Psikologi, Fakultas Psikologi, Universitas Sanata Dharma.

Penelitian ini bertujuan untuk mengetahui hubungan antara *perceived social support* dan resiliensi akademik pada taruna Akademi Militer. Hipotesis penelitian ini adalah terdapat hubungan yang positif antara *perceived social support* dan resiliensi akademik pada taruna Akademi Militer Magelang. Subjek yang terlibat dalam penelitian ini sebanyak 101 taruna Akademi Militer. Penelitian ini merupakan jenis penelitian kuantitatif dengan teknik pengambilan sampel *convenience sampling*. Penelitian ini menggunakan dua jenis skala model Likert yakni skala *Perceived Social Support* dan *The Academic Resilience Scale (ARS-30)*. Koefisien reliabilitas pada skala *The Academic Resilience Scale (ARS-30)* sebesar 0.892 dan pada skala *Perceived Social Support* sebesar 0.968. Data dianalisis menggunakan teknik korelasi *Pearson Product Moment*. Hasil uji korelasi menunjukkan nilai  $r$  sebesar 0.425 dengan nilai signifikansi ( $p$ ) = 0.000 ( $p < 0.001$ ). Berdasarkan uji korelasi, disimpulkan bahwa terdapat hubungan positif yang signifikan antara *perceived social support* dan resiliensi akademik pada taruna Akademi Militer. Artinya, semakin tinggi *perceived social support* para taruna terhadap dukungan sosial yang diterimanya, semakin tinggi pula resiliensi akademiknya.

Kata kunci : *perceived social support*, resiliensi akademik, taruna

**CORRELATION BETWEEN PERCEIVED SOCIAL SUPPORT  
AND ACADEMIC RESILIENCE IN MILITARY ACADEMY CADETS**

***ABSTRACT***

Putri, Verena Mutiara Ika. 2023. Correlation Between Perceived Social Support And Academic Resilience In Military Academy Cadets. *Thesis*. Yogyakarta: Psychology, Pscyhology Faculty, Sanata Dharma University.

*This study is aimed to determine the correlation between perceived social support and academic resilience in Military Academy Cadets. The hypothesis of this study is there was a positive correlation between perceived social support and academic resilience in Military Academy Cadets. The subjects of this study were 101 Military Academy Cadets. This study is quantitative study with convenience sampling method. This study uses two Likert scale such as Perceived Social Support scale dan The Academic Resilience Scale (ARS-30). Reliability coefficient of Perceived Social Support scale was 0.968 and The Academic Resilience Scale (ARS-30) was 0.892. The research data, were analyzed by Pearson Product Moment correlation. The correlation result showed that correlation coefficient score was 0.425 with the significant value ( $p$ ) = 0.000 ( $p < 0.001$ ). So, it can be conclude that there is a significant positive correlation between perceived social support and academic resilience in Military Academy Cadets. It means that the higher cadet's perceived social support they received, the higher their academic resilience.*

*Keywords : perceived social support, academic resilience, cadet*
