This research aims to determine: (1) The influence of social media marketing on customer loyalty, (2) The influence of personal selling on customer loyalty, (3) The influence of social media marketing on customer loyalty through customer engagement as a mediating variable, (4) The influence of personal selling towards customer loyalty through customer engagement as a mediating variable. The sampling technique in this research uses non-probability sampling with the quota sampling method. Apart from that, the data obtained was obtained by distributing questionnaires via g-form to 210 respondents spread across 14 cities according to the predetermined sample. The data analysis technique used in this research is Partial Least Square (PLS) with SmartPLS 3.0. Based on the results and analysis that have been carried out, the results of this research are: (1) Social media marketing has an effect on customer loyalty, (2) Personal selling has an effect on customer loyalty, (3) Customer engagement partially mediates social media marketing on customer loyalty, (4) Customer engagement partially mediates personal selling on customer loyalty.

Keywords: *Social media marketing, personal selling, customer loyalty, customer engagement*
