The research was motivated by the researcher's observation of the results of a survey of the involvement of young Catholics (OMK) in Parish of St Peter and Paul Temanggung. The results of the survey showed that there were intersections of involvement with the activities of the 5 aspects of church life, namely liturgy, community of faith, service, witness of faith and evangelisation. Based on that observation, the researcher saw the impact of involvement in the activities of the choir called St Peter & Paul Youth Choir. The researcher wants to see if there is an impact of the involvement of the OMK choir in church life at St. Peter and Paul Parish Temanggung. The involvement of OMK in church life is something that reflects the face of the church in the present and the future. This research uses descriptive qualitative research methods with respondent sampling using purposive sampling, respondents totaling 5 people who have been involved in St Peter & Paul Youth Choir activities for a long time, then validators from OMK Temanggung and St Peter & Paul Youth Choir coordinator. The data collection technique used a semi-structured interview method with the development of questions tailored to the indicators of the interview questions. The result of this study is that it was found that the impact of OMK involved in St. Peter & Paul Youth Choir is church life in the form of liturgy, namely lectors, psalmists and becoming a team of liturgical ministers. Then it was also found that the impact of OMK's involvement in St Peter & Paul Youth Choir also motivates OMK to increasingly live the church in the form of a living community of faith, and testimony of faith.
