ABSTRACT

This study aims to determine the relationship between sense of community and organizational interest of Sanata Dharma University students. This study involved 100 Sanata Dharma University students as respondents who were collected through Google form. The research hypothesis proposed by the researcher is that there is a positive relationship between sense of community and organizational interest of Sanata Dharma University students. Data Collection uses a questionnaire scale adapted from the sense of community index-II (2008) with 24 items and the interest development scale (2021) with 20 items. The reliability of the scale in this study has a coefficient of 0.946 on SCI-II and a coefficient of 0.974 on organizational interest. The results of this study indicate that there is a strong correlation between sense of community and organizational interest. The variable relationship has a coefficient of 0.661 with a p of 0.001 which is positive and strong category.

Keyword: Sense of community, organization interest, Sanata Dharma University, University students
