2024

Penelitian ini bertujuan untuk: 1) Mengetahui tingkat karakter kerjasama atlet basket di Daerah Istimewa Yogyakarta; 2) Mengidentifikasi capaian butir item pengukuran karakter kerjasama yang belum optimal.

Jenis penelitian ini adalah deskriptif kuantitatif. Subjek dalam penelitian ini adalah atlet basket di Daerah Istimewa Yogyakarta yang diperoleh dengan metode *Convenience Sampling* atau *Accidental Sampling* berjumlah 80 orang. Pengumpulan data menggunakan skala karakter kerjasama dengan 69 item valid dan memiliki indeks reabilitas Alpha Cronbach sebesar 0,95. Teknik pengumpulan data menggunakan skala Likert berdasarkan aspek-aspek: (1) Bekerja bersama, (2) Menyampaikan harapan yang positif, (3) Menghargai masukan, (4) Memberikan dorongan, (5) Membangun semangat kelompok.

Hasil penelitian menunjukkan bahwa sebagian besar atlet basket memiliki karakter kerjasama yang sangat tinggi sebesar (63%) dan tinggi (30%) yang mengindikasikan mereka mampu bekerja bersama. Hasil analisis pada capaian skor item menunjukkan bahwa sebanyak 47 (68%) item karakter kerjasama pada kategori sangat tinggi, 19 (28%) item karakter kerjasama pada kategori tinggi dan 3 (4%) item yang ada pada kategori sedang.

Kata Kunci : Karakter Kerjasama, Atlet Basket.

ABSTRACT

A SURVEY OF THE COOPERATION CHARACTER OF BASKETBALL ATHLETES IN THE SPECIAL REGION OF YOGYAKARTA

This research aims to: 1) Know the level of cooperation character of basketball athletes in the Special Region of Yogyakarta; 2) Identify the achievement of cooperation character measurement items that are not optimal.

This type of research is descriptive quantitative. The subjects in this study were basketball athletes in the Special Region of Yogyakarta obtained by Convenience Sampling or Accidental Sampling method totaling 80 people. Data collection uses a cooperation character scale with 69 valid items and has an Alpha Cronbach reliability index of 0.95. The data collection technique uses a Likert scale based on aspects: (1) Working together, (2) Conveying positive expectations, (3) Appreciating input, (4) Providing encouragement, (5) Building group spirit.

The results showed that most basketball athletes had a very high cooperation character (63%) and high (30%) which indicated they were able to work together. The results of the analysis on the achievement of item scores show that as many as 47 (68%) items of cooperation character in the very high category, 19 (28%) items of cooperation character in the high category and 3 (4%) items in the medium category.

Keywords: Cooperation Character, Basketball Athletes.
