

## ABSTRAK

Angeli, A.D.C. 2024. Dampak *Fatherless* terhadap Persepsi Relasi Romantis Perempuan Dewasa Awal. *Skripsi*. Yogyakarta: Psikologi, Fakultas Psikologi, Universitas Sanata Dharma.

Penelitian ini bertujuan untuk mengidentifikasi dan memahami dampak *fatherless* terhadap persepsi relasi romantis pada perempuan dewasa awal dengan menggunakan metode penelitian kualitatif. Realis digunakan sebagai pendekatan epistemologis untuk memahami fenomena menggunakan sudut pandang pikiran dan perasaan informan. Data dalam penelitian ini diperoleh melalui wawancara semi-terstruktur secara luring maupun daring terhadap enam orang perempuan berusia 20 hingga 22 tahun. Data yang terkumpul dianalisis menggunakan analisis tematik. Hasil penelitian mendapatkan tiga tema utama: 1) idealisasi tentang peran laki-laki, 2) kesenjangan relasi ayah dan anak, 3) preferensi pasangan. Fenomena *fatherless* dicirikan melalui terbatasnya intimasi antara ayah dan anak sehingga kebutuhan emosional anak terabaikan. Keenam informan menunjukkan pengalaman negatif yang dilalui bersama ayah membentuk persepsi untuk memilih pasangan lawan jenis yang tidak memiliki karakter serupa dengan ayah.

**Kata kunci:** *fatherless*, persepsi relasi romantis, perempuan dewasa awal, ayah

## ABSTRACT

Angeli, A.D.C. 2024. The Impact of Fatherlessness on Early Adult Women's Romantic Relationship Perceptions. *Thesis*. Yogyakarta: Psychology, Psychology Faculty, Sanata Dharma University.

*This study aims to identify and understand the impact of fatherlessness on perceptions of romantic relationships in early adult women using qualitative research methods. Realist is used as an epistemological approach to understand the phenomenon using the point of view of the informants' thoughts and feelings. Data in this study were obtained through offline and online semi-structured interviews with six women aged 20 to 22 years. The collected data were analyzed using thematic analysis. The results obtained three main themes: 1) idealization of male roles, 2) father-daughter relationship gaps, 3) partner preferences. The fatherless phenomenon is characterized by limited intimacy between fathers and children so that the emotional needs of children are neglected. The six informants showed that the negative experiences they had with their fathers shaped their perceptions to choose partners of the opposite sex who did not have similar characters to their fathers.*

**Keywords:** *fatherless, perceptions of romantic relationships, early adult women, father*
