

ABSTRAK

Melano, R. Y. V. (2025). *Social loafing pada pengurus organisasi kemahasiswaan Universitas Sanata Dharma* [Skripsi, Universitas Sanata Dharma].

Penelitian ini bertujuan untuk mengetahui tingkat *social loafing* pada pengurus organisasi kemahasiswaan di Universitas Sanata Dharma. Subjek penelitian berjumlah 106 mahasiswa yang pernah menjadi pengurus organisasi kemahasiswaan di Universitas Sanata Dharma. Metode pengumpulan data menggunakan Skala *Social Loafing* dengan aspek *dilution effect* dan aspek *immediacy gap* dalam format *self-report questionnaire*. Uji coba skala menghasilkan koefisien reliabilitas sebesar 0,935. Data penelitian dianalisis secara statistik deskriptif dan uji perbedaan. Hasil penelitian menunjukkan bahwa sebagian besar pengurus organisasi kemahasiswaan Universitas Sanata Dharma memiliki tingkat *social loafing* rendah. Hasil penelitian ini juga menunjukkan bahwa tidak terdapat perbedaan tingkat *social loafing* secara signifikan pada pengurus organisasi kemahasiswaan Universitas Sanata Dharma berdasarkan jenis kelamin, jabatan kepengurusan, ukuran kelompok, dan metode koordinasi dalam organisasi yang diikuti.

Kata kunci: *Social loafing; organisasi kemahasiswaan; dilution effect; immediacy gap*

ABSTRACT

Melano, R. Y. V. (2025). *Social loafing student organizations officers at Universitas Sanata Dharma* [Undergraduate Thesis, Universitas Sanata Dharma].

This study aims to discover the level of social loafing among student organizations officers at Universitas Sanata Dharma. The subjects comprised 106 students who had held officer positions in various campus organizations. Data were collected using a Social Loafing Scale encompassing the dilution effect and immediacy gap aspects, and administered as a self-report questionnaire. The scale trial yielded a high reliability coefficient ($\alpha = 0.935$). Research data were analyzed through descriptive statistics and inferential tests of differences. The findings indicate that the majority of the student organization officers at Universitas Sanata Dharma exhibit low levels of social loafing. Furthermore, no significant differences in social loafing levels were found based on sexes, organizational position, group size, or coordination method.

Keywords: social loafing; student organizations; dilution effect; immediacy gap
