2026

Penelitian ini bertujuan untuk menganalisis pengaruh kurs valuta asing dan inflasi terhadap ekspor non migas Indonesia. Data yang digunakan merupakan data sekunder berbentuk *time series* bulanan periode 2021-2025 yang diperoleh dari Badan Pusat Statistik (BPS), Bank Indonesia (BI), dan Kementerian Perdagangan (KEMENDAG). Metode analisis yang digunakan adalah regresi linier berganda untuk menguji pengaruh variabel independen terhadap variabel dependen baik secara parsial maupun simultan. Hasil penelitian menunjukkan bahwa kurs valuta asing berpengaruh positif dan signifikan terhadap ekspor non migas. Hal ini menunjukkan bahwa depresiasi nilai tukar dapat meningkatkan ekspor non migas Indonesia di pasar internasional. Sementara itu, inflasi memiliki pengaruh positif tetapi tidak signifikan terhadap ekspor non migas, yang berarti perubahan inflasi tidak secara langsung mempengaruhi kinerja ekspor selama periode penelitian. Secara simultan, kurs valuta asing dan inflasi berpengaruh signifikan terhadap ekspor non migas.

**Kata kunci:** kurs valuta asing, inflasi, ekspor non migas, regresi linier berganda

**ABSTRACT**

**THE EFFECT OF FOREIGN EXCHANGE RATES AND INFLATION ON  
NON OIL AND GAS EXPORTS IN INDONESIA**

This study aims to analyze the influence of foreign exchange rates and inflation on Indonesia's non-oil and gas exports. The data used is secondary data in the form of a monthly *time series* for the 2021-2025 period obtained from the Central Statistics Agency (BPS), Bank Indonesia (BI), and the Ministry of Trade (KEMENDAG). The analysis method used is multiple linear regression to test the influence of independent variables on dependent variables both partially and simultaneously. The results of the study show that the foreign exchange rate has a positive and significant effect on non oil and gas exports. This shows that exchange rate depreciation can increase the price competitiveness of Indonesian non-oil and gas exports. Meanwhile, inflation has a positive but insignificant effect on non-oil and gas exports, meaning that changes in inflation do not directly affect export performance during the study period. Simultaneously, exchange rates and inflation affect non-oil and gas exports.

**Keywords:** *foreign exchange rate, inflation, non oil and gas exports, multiple linear regression*
