

## ABSTRAK

Penelitian ini dilatarbelakangi oleh adanya Peraturan Menteri Kesehatan Republik Indonesia Nomor 30 Tahun 2014 tentang Standard Pelayanan Kefarmasian di Puskesmas. Penelitian ini bertujuan untuk mengetahui gambaran pelaksanaan Standard Pelayanan Kefarmasian berdasarkan Peraturan Menteri Kesehatan Nomor 30 Tahun 2014 yang ada di Puskesmas-Puskesmas Kota Yogyakarta setelah dikeluarkannya peraturan tersebut. Apoteker penanggung jawab yang ada di Puskesmas menjadi responden dalam penelitian ini. Penelitian ini termasuk jenis penelitian non eksperimental dengan rancangan penelitian deskriptif. Adapun instrument penelitian ini berupa kuesioner. Jumlah subjek yang digunakan dalam penelitian ini adalah 14 Puskesmas yang ada di Kota Yogyakarta. Hasil penelitian menunjukkan bahwa karakteristik demografi responden didominasi oleh perempuan sebanyak 12 orang sedangkan laki-laki sebanyak 2 orang, dengan rentang usia 23-40 tahun. Secara keseluruhan pelaksanaan standard pelayanan kefarmasian di Puskesmas Kota Yogyakarta pada Puskesmas rawat jalan sebesar 63,95% dan rawat inap sebesar 68,83%. Sehingga dapat dikatakan bahwa standard pelayanan kefarmasian di Puskesmas Kota Yogyakarta belum dilaksanakan secara menyeluruh sesuai dengan peraturan Menteri Kesehatan Nomor 30 Tahun 2014.

### **ABSTRACT**

This research was motivated by the Regulation of the Minister of Health of the Republic of Indonesia Number 30 Year 2014 concerning Standards of Pharmaceutical Services in the Health Center. This study aims to describe the implementation of the Standard of Pharmaceutical Services based on the Minister of Health No. 30 of 2014 in the city of Yogyakarta-district health centers after the issuance of the regulation. Pharmacist in charge in health centers were respondents in this study. This research is non-experimental research with the study design deskriptif. adapun this research instrument was a questionnaire. The number of subjects used in this study are 14 health centers in the city of Yogyakarta. The results showed that the demographic characteristics of respondents are dominated by women as many as 12 people, while men by 2 people, with an age range of 23-40 years. The overall implementation of the standards of pharmacy services at the health center of Yogyakarta on outpatient health centers amounted to 63.95% and hospitalization by 68.83%. So it can be said that the standard of pharmacy services at the health center of Yogyakarta has not been implemented fully in accordance with the regulations of the Minister of Health No. 30 of 2014.
