

HUBUNGAN ANTARA PERSEPSI PENGAWASAN ORANG TUA BEKERJA DAN PERILAKU SEKSUAL REMAJA DI BATAM

Catarina Chandra Cinitya

ABSTRAK

Penelitian ini merupakan penelitian kuantitatif korelasional yang bertujuan untuk melihat hubungan persepsi pengawasan orang tua bekerja dan perilaku seksual remaja di Batam. Hipotesis penelitian ini adalah terdapat hubungan negatif antara persepsi pengawasan orang tua bekerja dan perilaku seksual remaja di Batam. Subjek dalam penelitian ini adalah remaja berusia 11-21 tahun yang belum menikah di kota Batam dan memiliki kedua orang tua yang bekerja. Peneliti menggunakan teknik *purposive sampling* pada penelitian ini. Subjek terdiri dari 253 remaja yang bersekolah di beberapa SMP, SMA/SMK, dan salah satu kampus di Batam. Pengumpulan data pada penelitian ini menggunakan skala persepsi pengawasan orang tua dan skala perilaku seksual. Koefisien reliabilitas skala persepsi pengawasan orang tua sebesar 0,901 dan skala perilaku seksual sebesar 0,972 yang dihitung menggunakan *Alpha Cronbach* melalui *SPSS for Windows 16.00*. Teknik analisis data menggunakan pengujian korelasi *Spearman's Rho*. Hasil pengujian hipotesis menunjukkan bahwa terdapat hubungan negatif yang signifikan antara persepsi pengawasan orang tua bekerja dan perilaku seksual remaja ($r = -0,238$, $\text{sig } 0,000$). Hal ini menunjukkan bahwa hipotesis penelitian ini diterima, dimana semakin tinggi pengawasan orang tua maka semakin rendah perilaku seksual remaja.

Kata kunci: persepsi pengawasan orang tua bekerja, perilaku seksual remaja, remaja

THE CORRELATION BETWEEN WORKING PARENT'S CONTROL PERCEPTION AND ADOLESCENT'S SEXUAL BEHAVIOR IN BATAM

Catarina Chandra Cinitya

ABSTRACT

This research was a correlational quantitative study that aims to examine the correlation between working parent's control perception and adolescent's sexual behavior in Batam. The hypothesis proposed was that is a negative correlation between working parent's control perception and adolescent's sexual behavior in Batam. Subjects in this research were unmarried adolescents within 11-21 years old who have working parents. The researcher used purposive sampling in this research. Subjects were students who study in some Junior High School, Senior High School/Vocational High School, and one of the campuses in Batam. The instruments in this research were parental control perception scale and sexual behavior scale. The reability coefficient of parental control perception scale was 0,901 and sexual behavior scale was 0,972. These numbers were the result of calcullation using Alpha Cronbach through SPSS for Windows 16.00. The data analize technique used in this research was Spearman's Rho. The result shows that there was a significant negative correlation and between working parent's control perception and adolescent's sexual behavior ($r = -0,238$, $sig = 0,000$). This shows that the hypothesis was accepted, in which the higher the parental control get the lower adolescent's sexual behavior become.

Keywords: working parent's control perception, adolescents's sexual behavior, adolescent
