HUBUNGAN DUKUNGAN SOSIAL PRAMURUKTI DENGAN *SUCCESSFUL AGING* WANITA LANJUT USIA DI PANTI WREDHA

Putri Retno Kinanti

ABSTRAK

Penelitian ini bertujuan untuk mengetahui apakah ada hubungan antara dukungan sosial pramurukti dengan *successful aging* wanita lanjut usia di panti wredha. Hipotesis yang diajukan, yaitu ada hubungan positif antara dukungan sosial pramurukti dengan *successful aging* wanita lanjut usia di panti wredha. Subjek dalam penelitian ini terdiri dari 50 wanita lanjut usia, usia 60-75, tinggal di panti wredha, dapat berkomunikasi dengan baik. Pengumpulan data dilakukan dengan cara menyebarkan skala dukungan sosial pramurukti dan skala *successful aging*. Setelah dilakukan *tryout* terpakai pada skala dukungan sosial pramurukti diperoleh koefisien reliabilitas sebesar 0,902, sedangkan pada skala *successful aging* diperoleh koefisien reliabilitas sebesar 0,866. Selain itu, telah dilakukan juga uji normalitas dan linearitas dengan hasil data tersebut linear dan normal. Data penelitian ini dianalisis menggunakan teknik *Pearson Product Moment Correlation* karena distribusi data normal. Koefisien korelasi yang diperoleh sebesar 0,665 dengan probabilitas 0,000 (p<0,01). Hasil penelitian ini menunjukkan bahwa ada hubungan positif antara dukungan sosial pramurukti dengan *successful aging* wanita lanjut usia di panti wredha. Dapat disimpulkan bahwa semakin tinggi dukungan sosial pramurukti, maka semakin tinggi *successful aging* wanita lanjut usia di panti wredha.

Kata Kunci : dukungan sosial pramurukti, *successful aging*, wanita lanjut usia

THE RELATION OF SOCIAL SUPPORT FROM NURSE AND SUCCESSFUL AGING ELDERLY WOMEN IN NURSING HOME

Putri Retno Kinanti

ABSTRACT

This research tends to know whether a relationship exist between social support from nurse and successful aging elderly women in nursing home. The hypothesis that proposed is, there are positive relationship between social support from nurse and successful aging elderly women in nursing home. Subjects in this research consist of 50 elderly women , age range 60—75 years old, who live in the nursing home, and seem to be able to communicate nicely. Data collection is using the spreading of social support from nurse scale and the successful aging scale. After tryout has been performed using the social support from nurse scale, reliability coefficient achieved for 0,902, while the successful aging scale obtained reliability coefficient for 0,866. Furthermore, normality test and linearity have been conducted with the result shows that the data outcome both linear and normal. Data of this research are analyzed with Pearson Product Moment Correlation technique because of data distribution that shows normal. Correlation Coefficient was obtained on the point 0,665 with probability 0,000 (p<0,01). The result of this research shows that there are positive relationship between social support from nurse and successful aging elderly women in nursing home. It can be concluded that the higher social support from nurse the higher successful aging elderly women in nursing home.

Keywords: social support from nurse, successful aging, elderly women.
