The purpose of this study is to determine whether the determination of tariff for hospitalization room of Santo Yusup Boro Hospital has already referred to the method of time and material pricing.

This research is a case study. The study was conducted at the Hospital of Santo Yusup Boro in January to August, 2014. The data was taken by interview, observation, and documentation. The tariff of Santo Yusup Boro Hospital were compared with those calculated using time and material pricing method.

Based on the analysis conducted it can be concluded that the determination of tariff for hospitalization room conducted in Santo Yusup Boro Hospital did not refer to the *time and material pricing* method.
