2007

Tujuan dari penelitian ini adalah untuk mengetahui apakah ada hubungan antara; (1) status sosial ekonomi orang tua dengan minat siswa melanjutkan studi ke perguruan tinggi; (2) prestasi belajar dengan minat siswa melanjutkan studi ke perguruan tinggi; (3) motivasi belajar dengan minat siswa melanjutkan studi ke perguruan tinggi.

Penelitian ini dilaksanakan di SMA Pangudi Luhur Yogyakarta pada bulan Mei 2006. Populasi dari penelitian ini adalah seluruh siswa kelas III SMA Pangudi Luhur sebanyak 117 siswa. Sampel dari penelitian ini sebanyak 75 siswa. Teknik pengambilan sampel yang digunakan adalah proportional random sampling. Metode pengumpulan data yang digunakan adalah kuesioner, wawancara dan dokumentasi. Teknik analisis data yang digunakan adalah koefisien korelasi product moment.

Hasil analisis data menunjukkan bahwa; (1) ada hubungan yang positif dan signifikan antara status sosial ekonomi orang tua dengan minat siswa melanjutkan studi ke perguruan tinggi, hal ini dapat dilihat dari nilai $r = 0,393$ dan nilai $t_{hit} = 3,68 > t_{tab} = 2,645$; (2) ada hubungan yang positif dan signifikan antara prestasi belajar dengan minat siswa melanjutkan studi ke perguruan tinggi, hal ini dapat dilihat dari nilai $r = 0,443$ dan nilai $t_{hit} = 4,25 > t_{tab} = 2,645$; (3) ada hubungan yang positif dan signifikan antara motivasi belajar dengan minat siswa melanjutkan studi ke perguruan tinggi, hal ini dapat dilihat dari nilai $r = 0,433$ dan nilai $t_{hit} = 4,11 > t_{tab} = 2,645$.

ABSTRACT

THE RELATIONSHIP BETWEEN PARENT'S ECONOMICAL BACKGROUND, LEARNING ACHIEVEMENT LEARNING MOTIVATION AND STUDENT'S INTEREST IN TAKING AN EDUCATION IN UNIVERSITY AFTER GRADUATION

A Case Study : Students of third grade of SMA Pangudi Luhur,
Jl.P.Senopati 18 Yogyakarta

2007

The purpose of this research is to find out whether or not there are any relationship between; (1) sosial economical background of the parents and students' interests to continue their study to university; (2) students' achievements and students' interests to continue their study to university; (3) learning motivation and students' interests to continue their study to university.

This research took "SMA Pangudi Luhur" Yogyakarta as the setting of the research on May 2006. The population was 117 students of third grade of "SMA Pangudi Luhur".The samples were 75 students. The technique in sample taking was proportional random sampling.The instruments of the research were questionnaire, interview and documentation. This research used coefficient correlation product moment as the data analysis technique.

The data analysis show that; (1) there is positive and significant relationship between sosial economical background of the parents and students' interests to continue their study to university, it can be seen from the value of $r = 0,393$ and value of $t_{count} = 3,68 > t_{table} = 2,645$; (2) there is positive and significant relationship between students' achievements and students' interests to continue their study to university, it can be seen from the value of their study to university, it can be seen from the value of $r = 0,443$ and the value of $t_{count} = 4,25 > t_{table} = 2,645$; (3) there is positive and significant relationship between learning motivation and students' interests to continue their study to university, it can be seen from the value of $r = 0,433$ and the value of $t_{count} = 4,11 > t_{table} = 2,645$.
